Extremidad Inferior

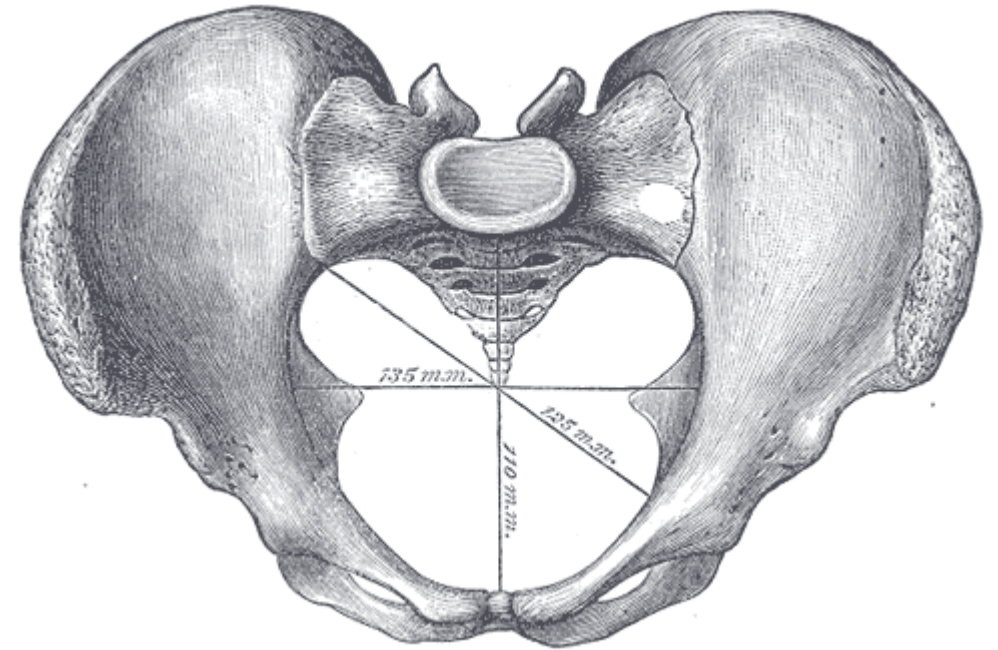

Hueso coxal

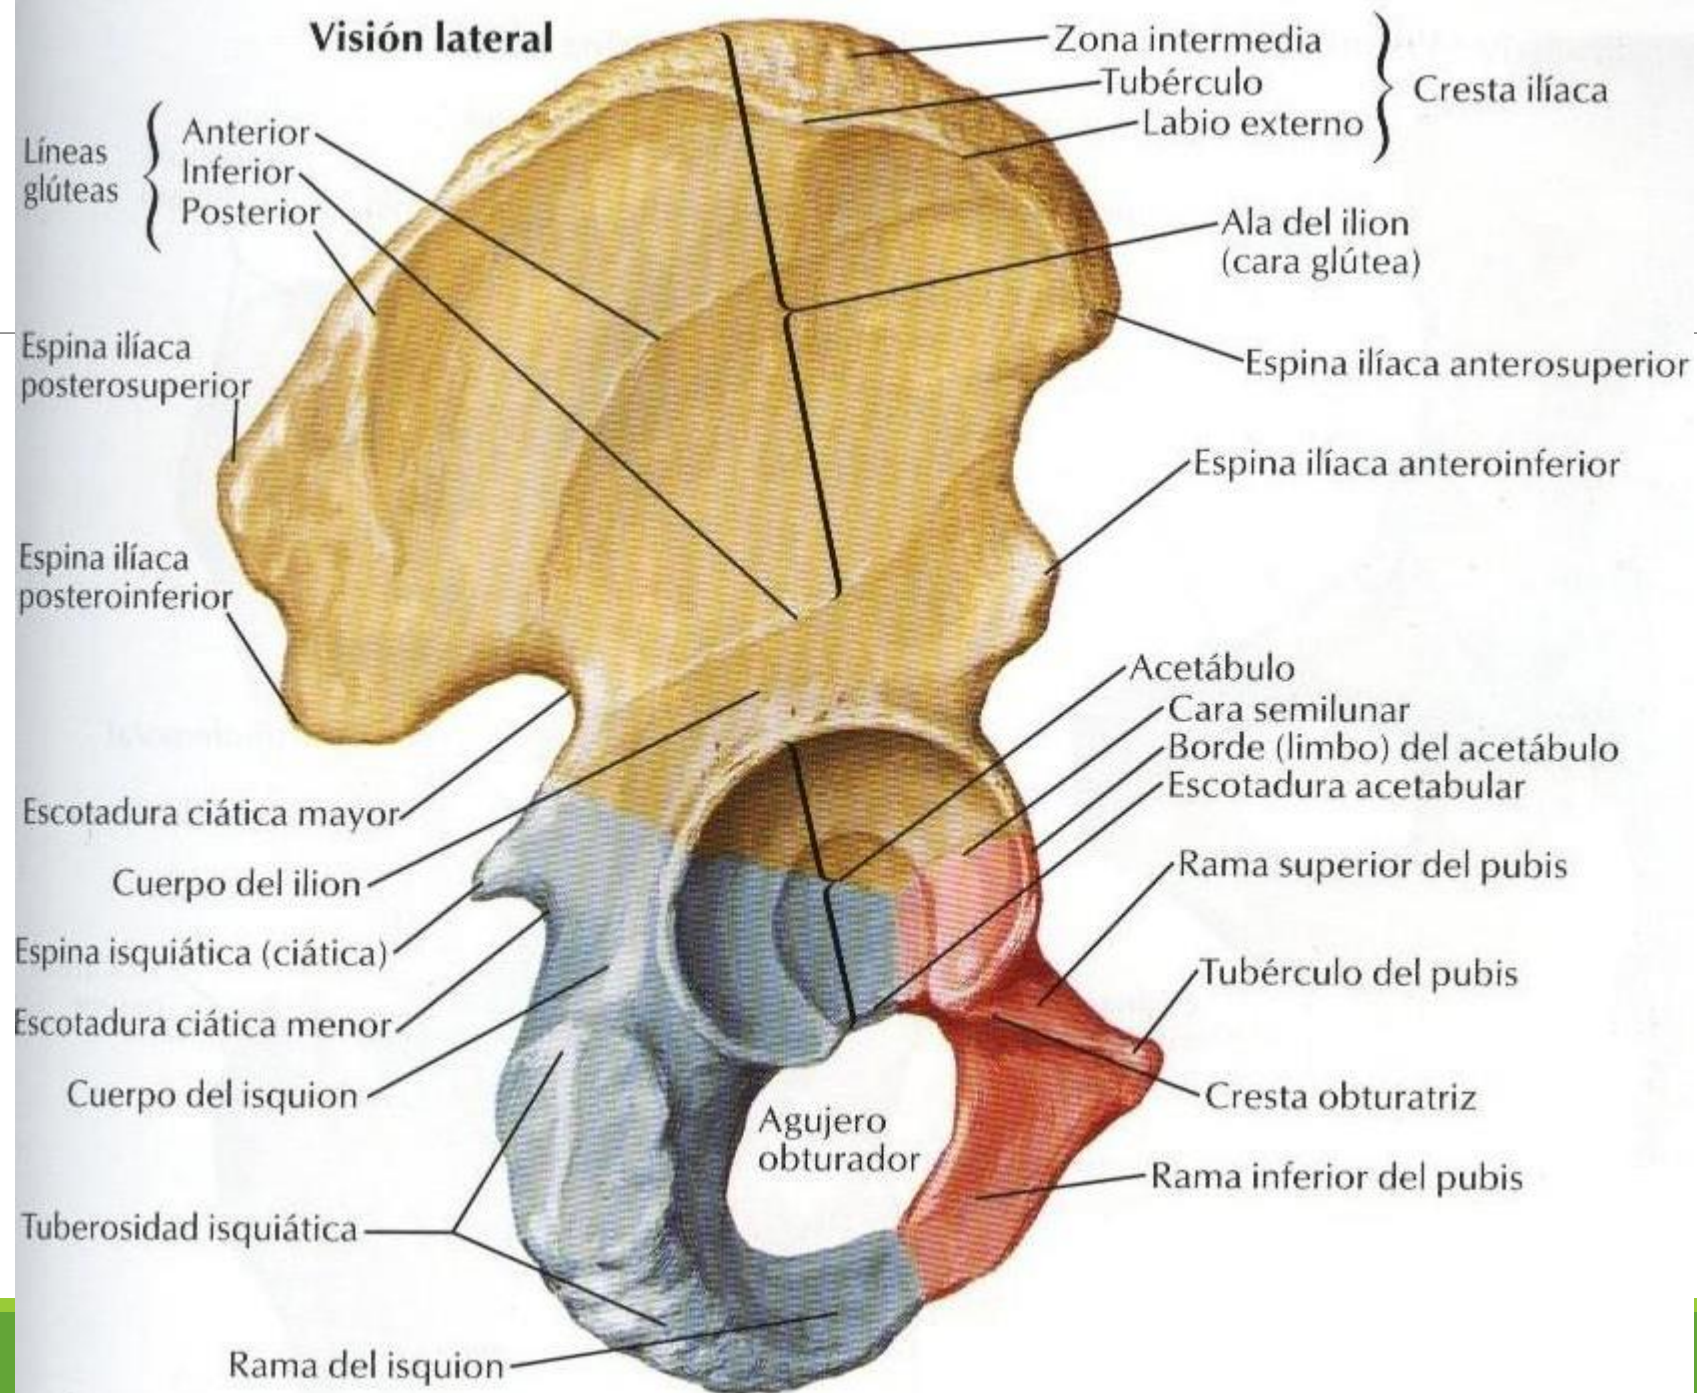

Coxal derecho

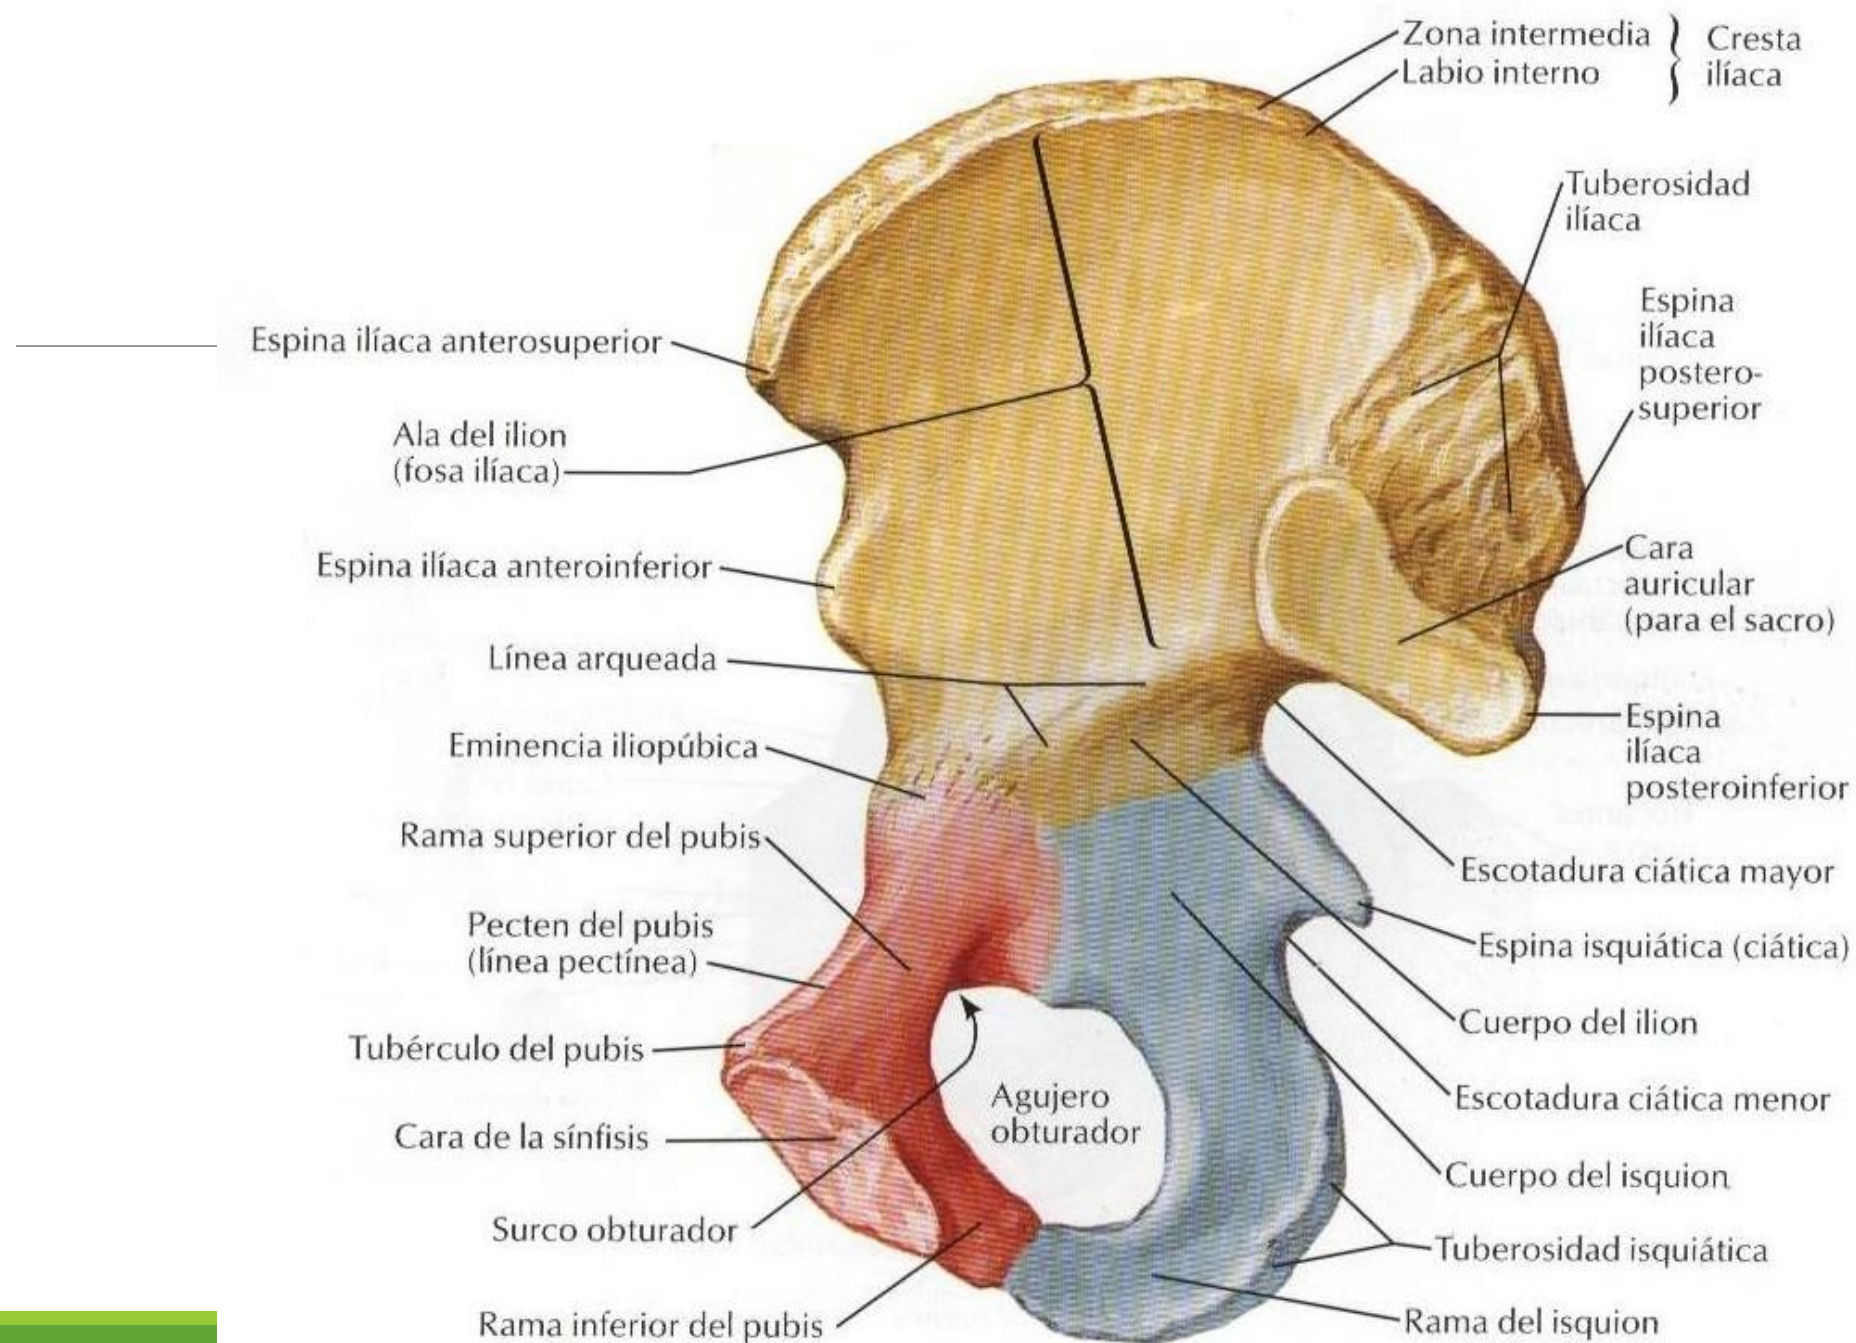

Coxal izquierdo

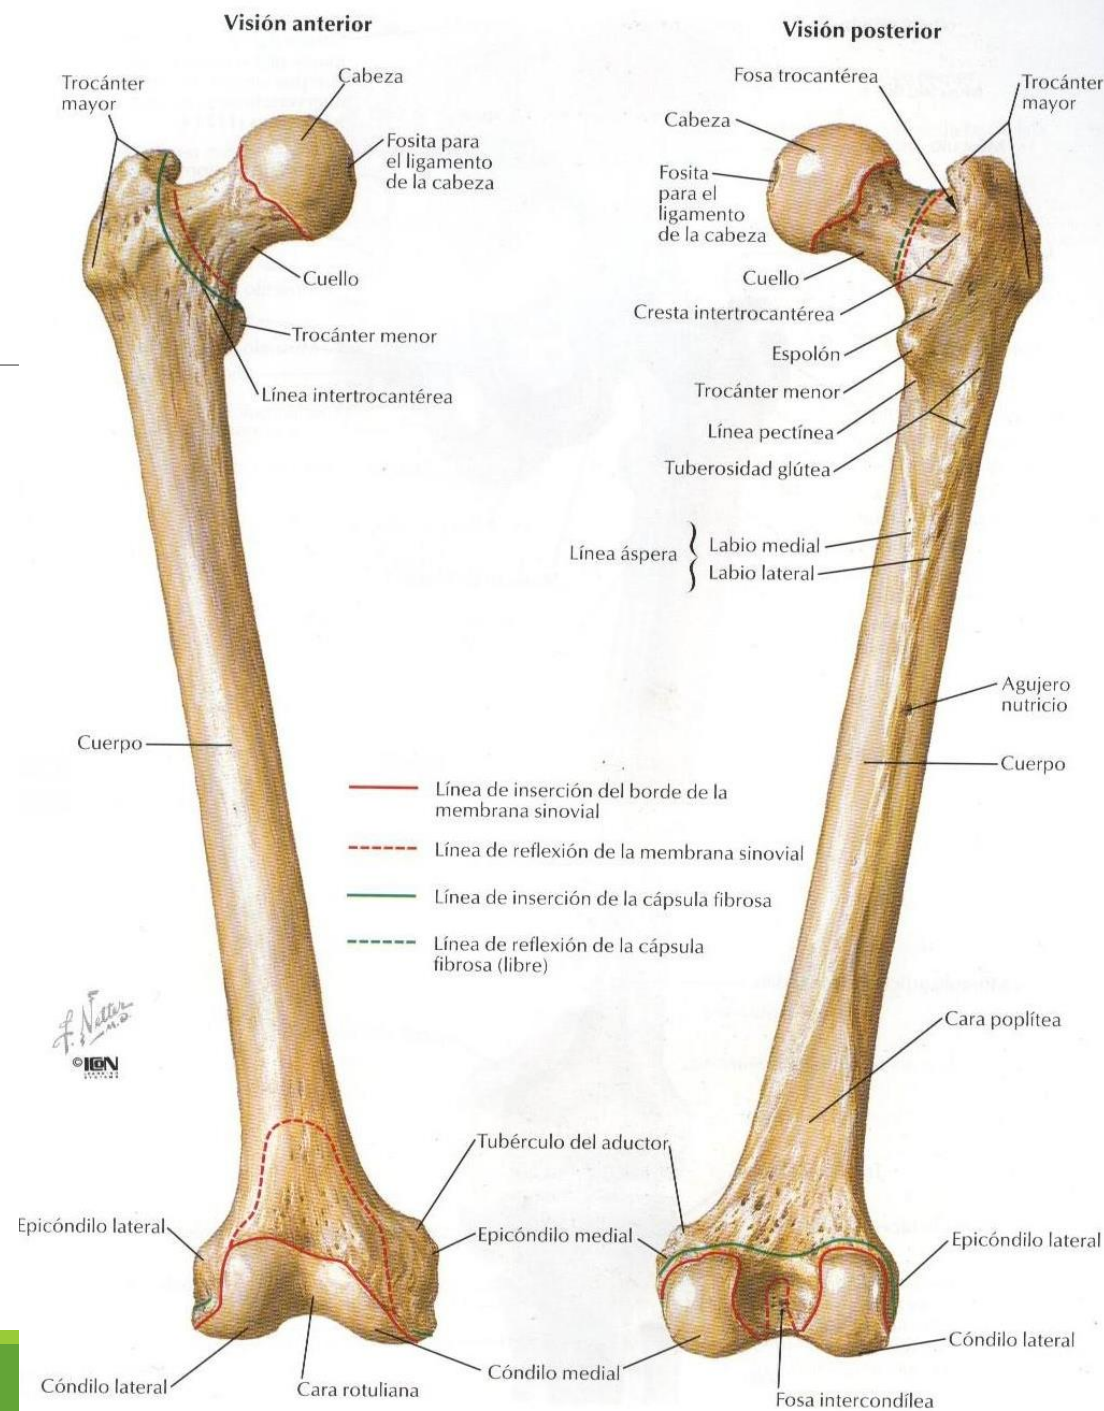

Visión lateral

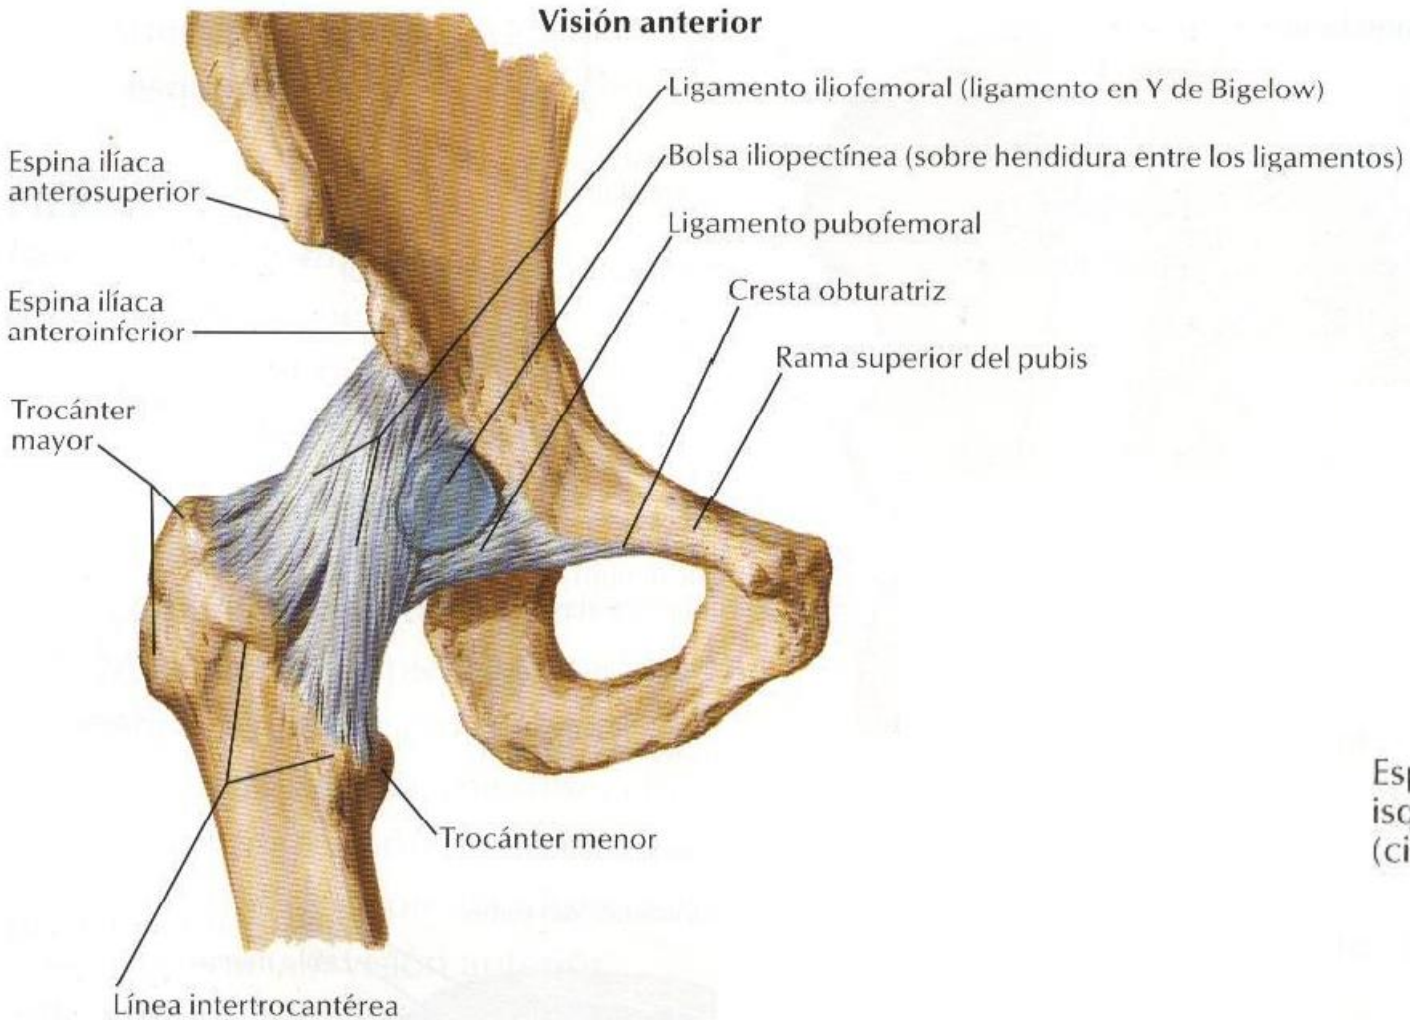

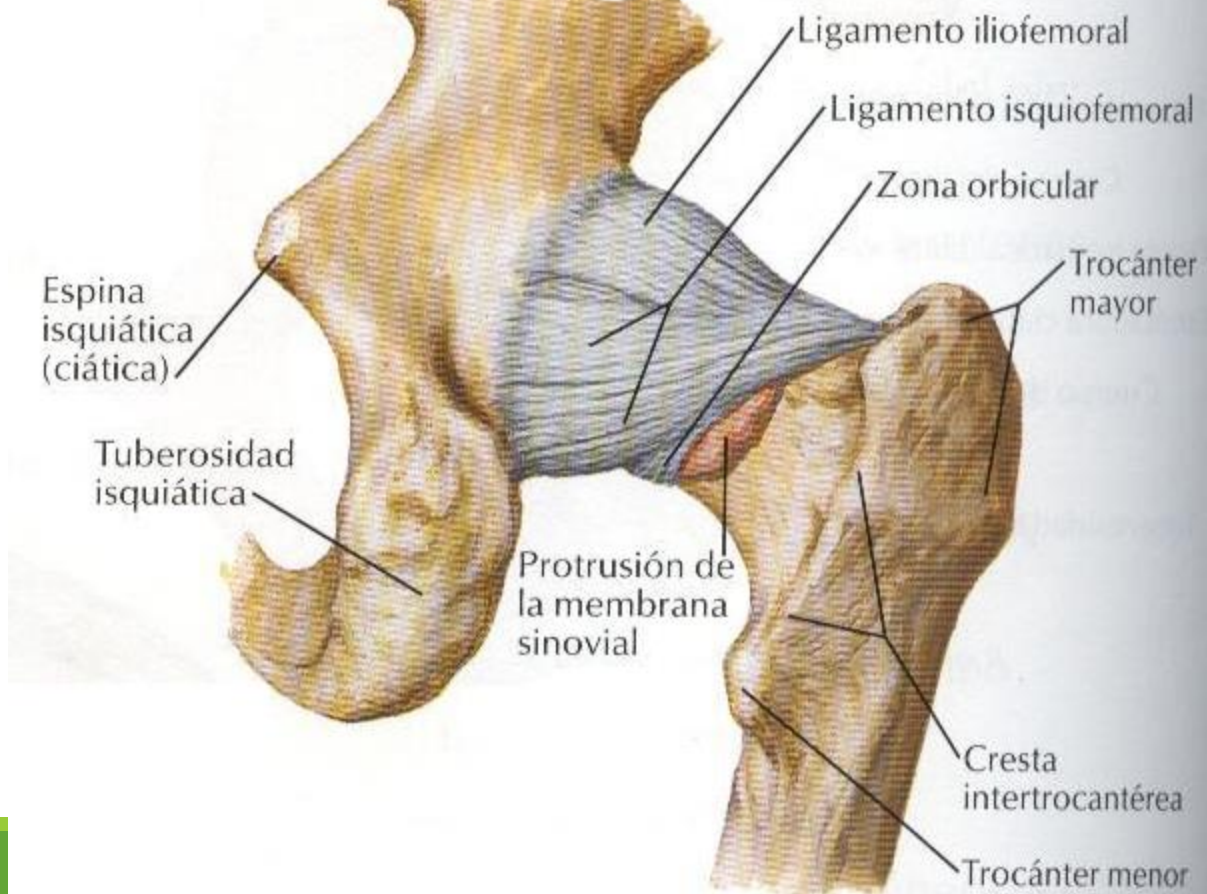

Fémur

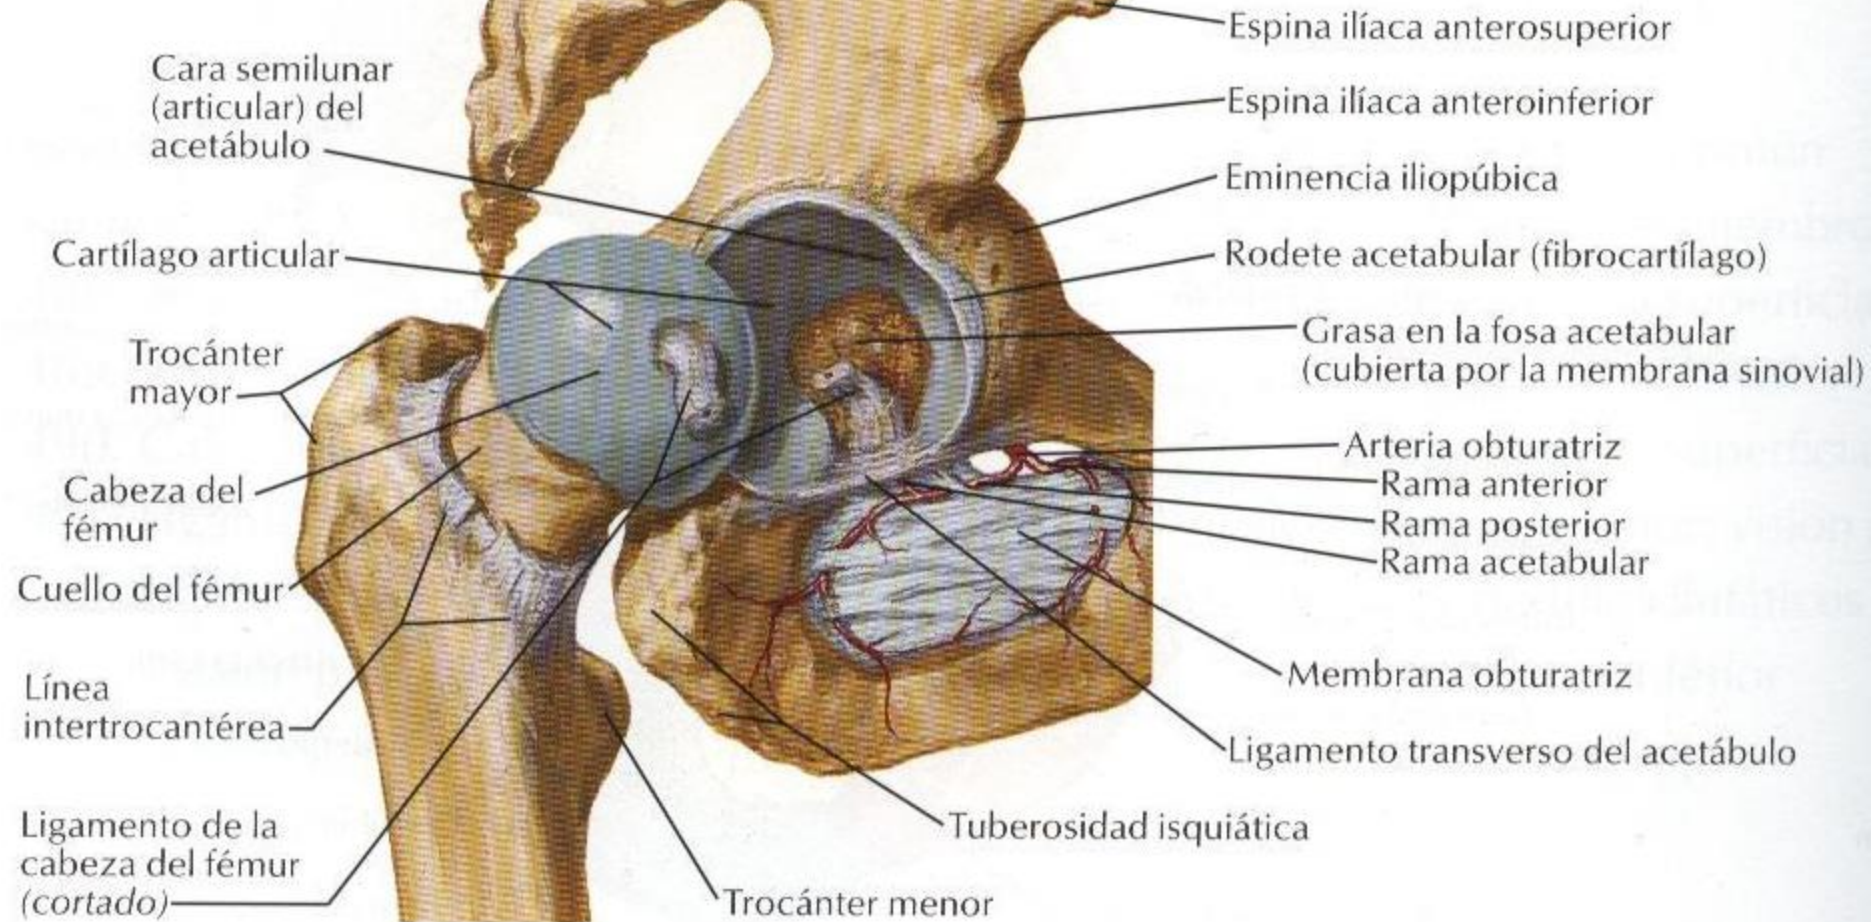

Visión anterior

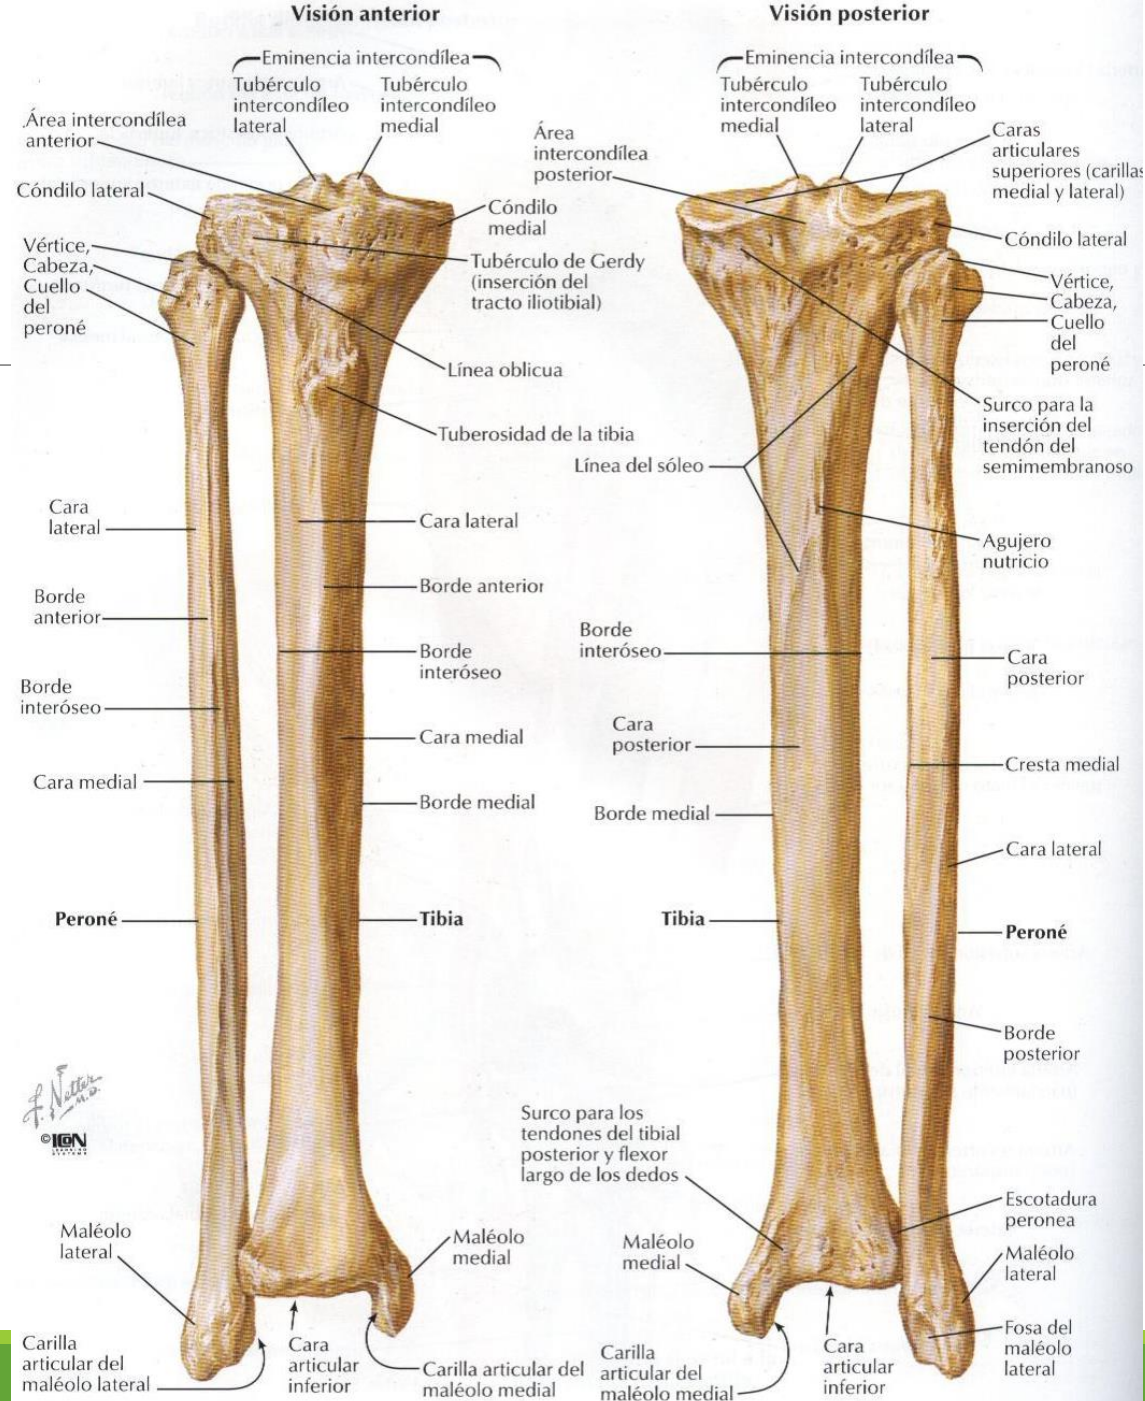

Visión posterior

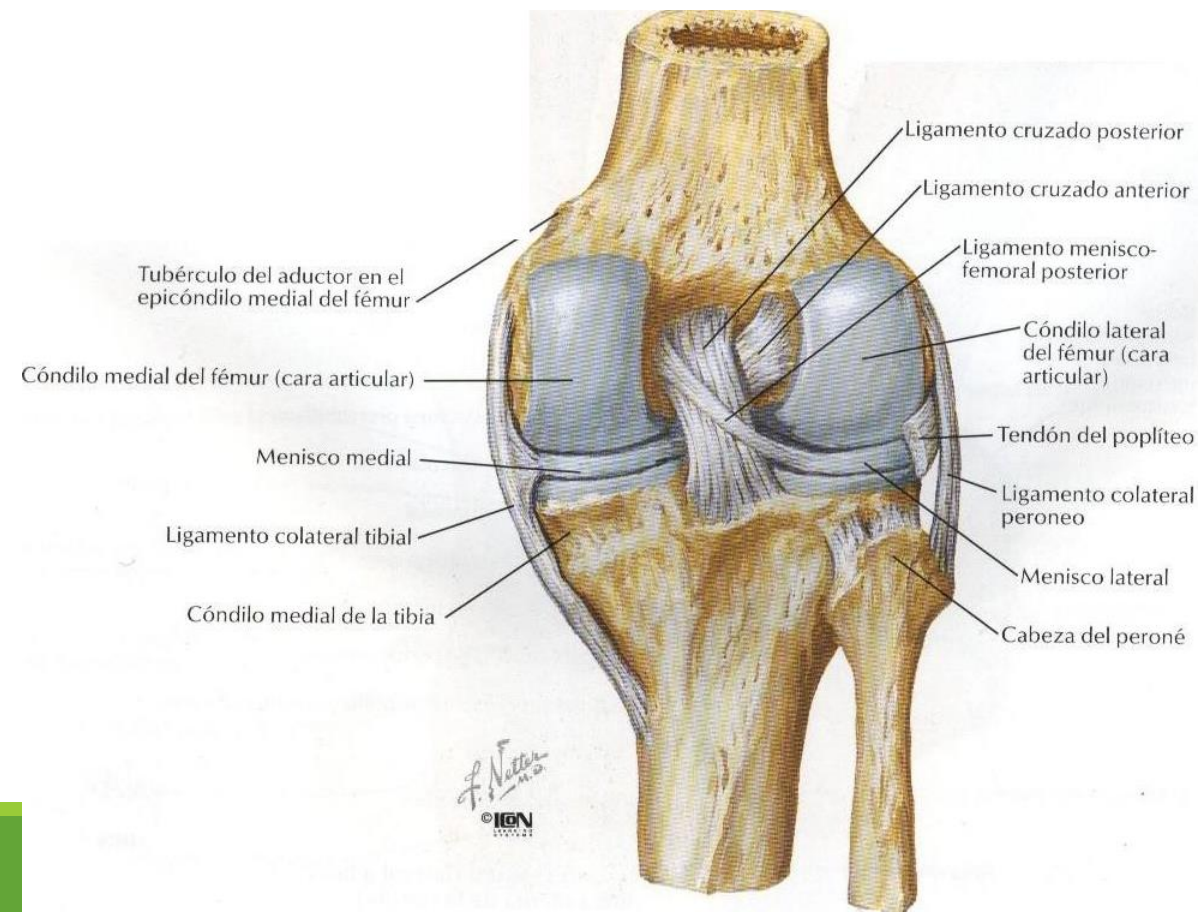

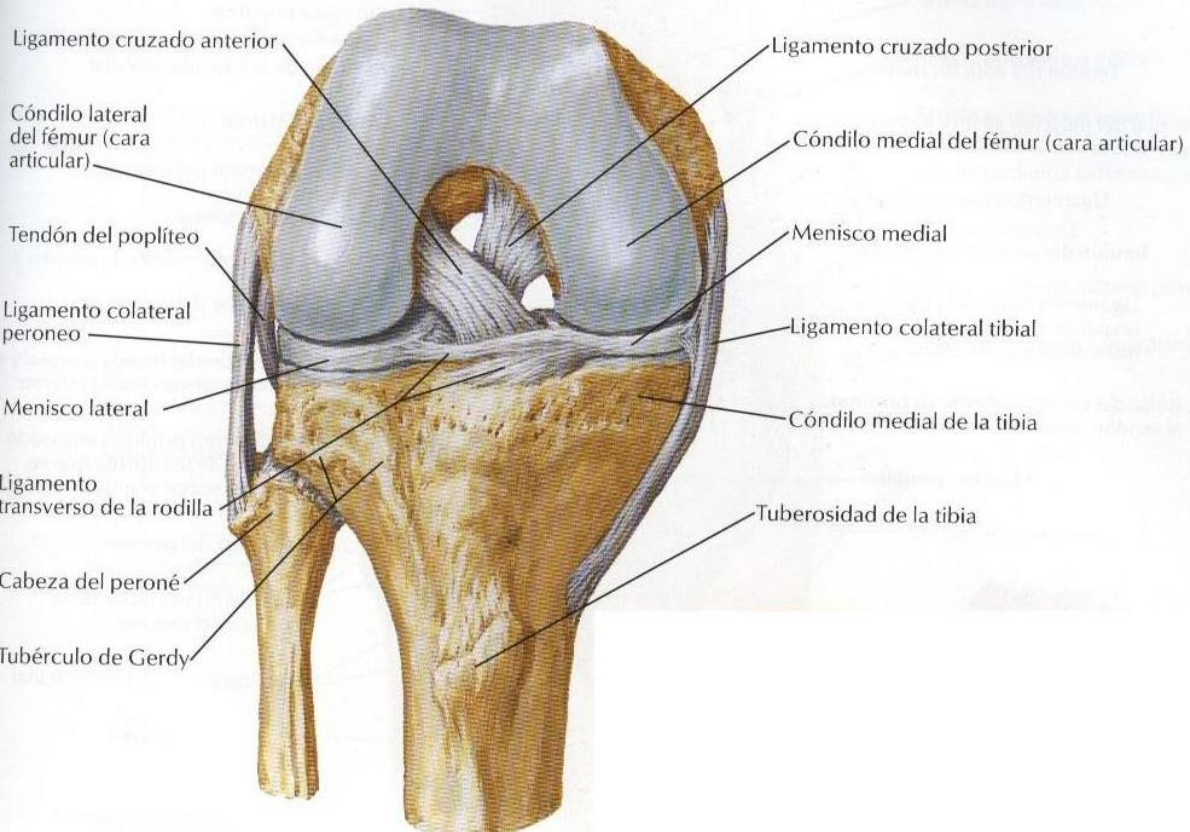

**Articulación abierta:
visión lateral**

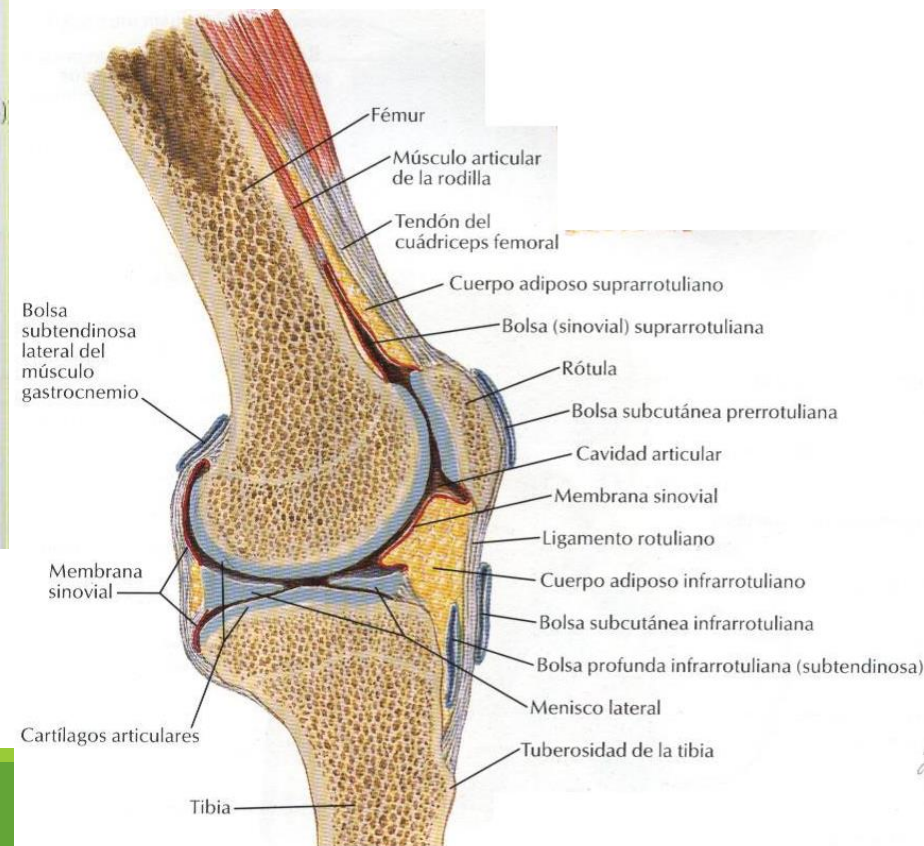

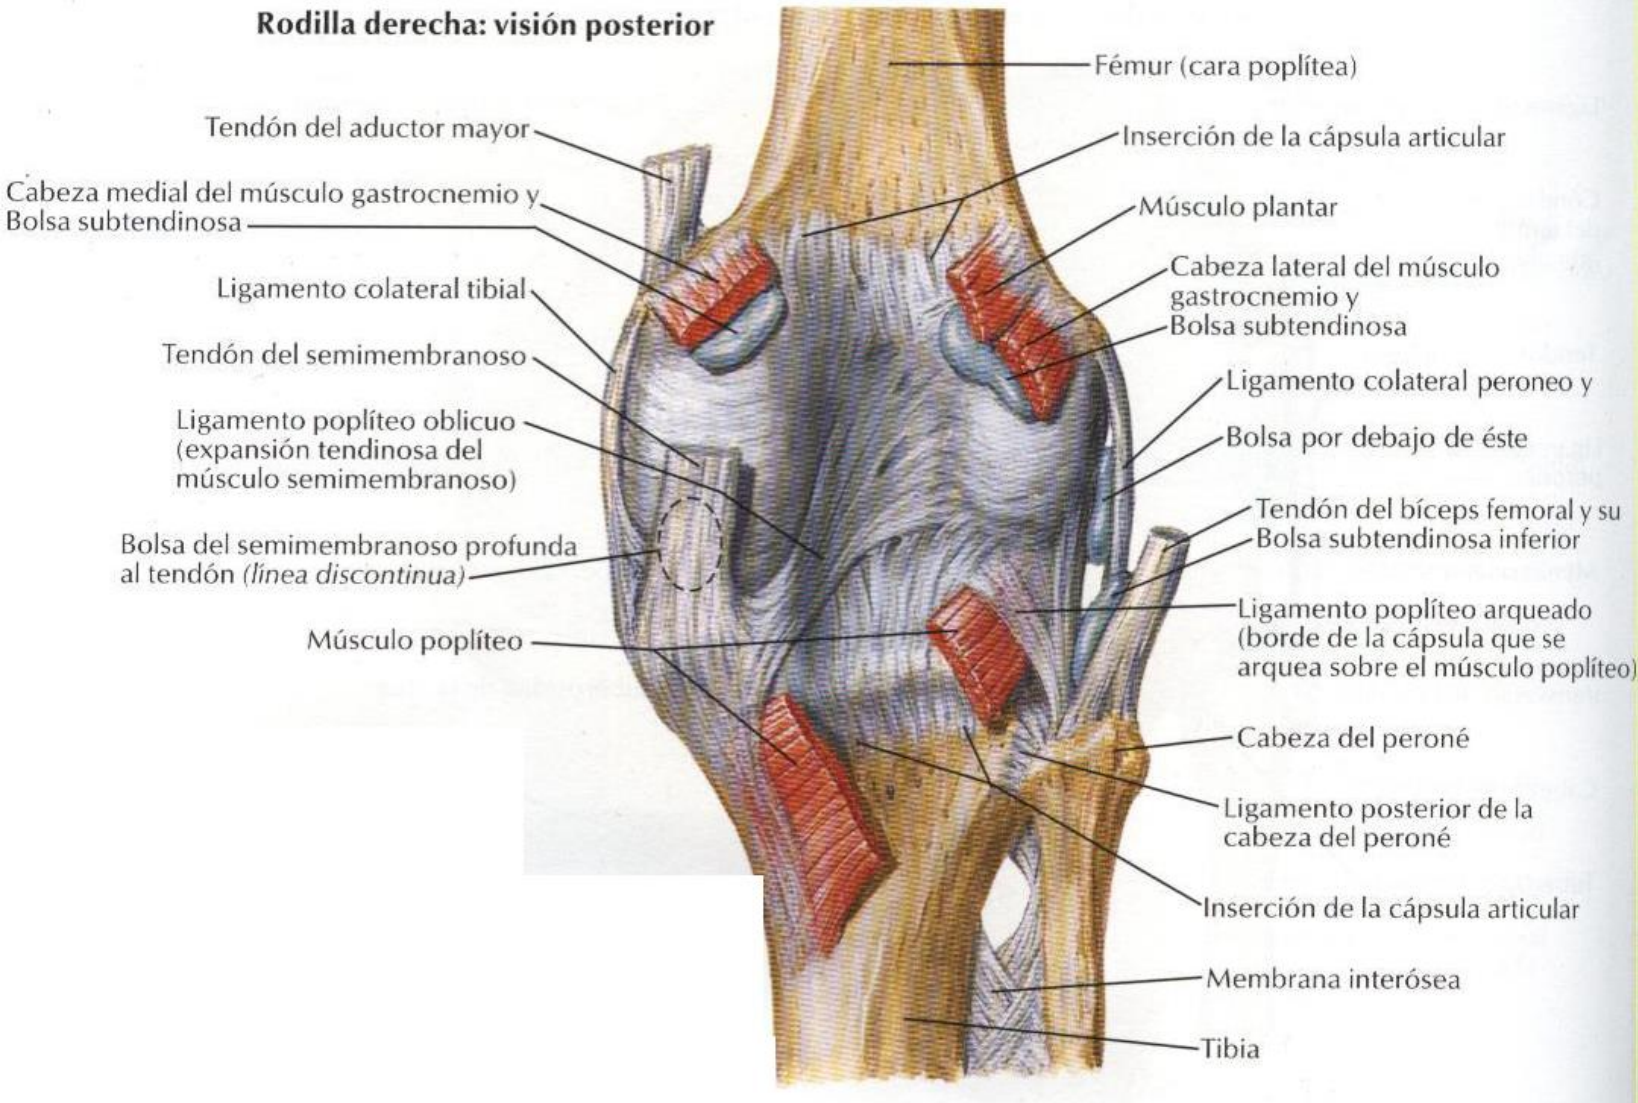

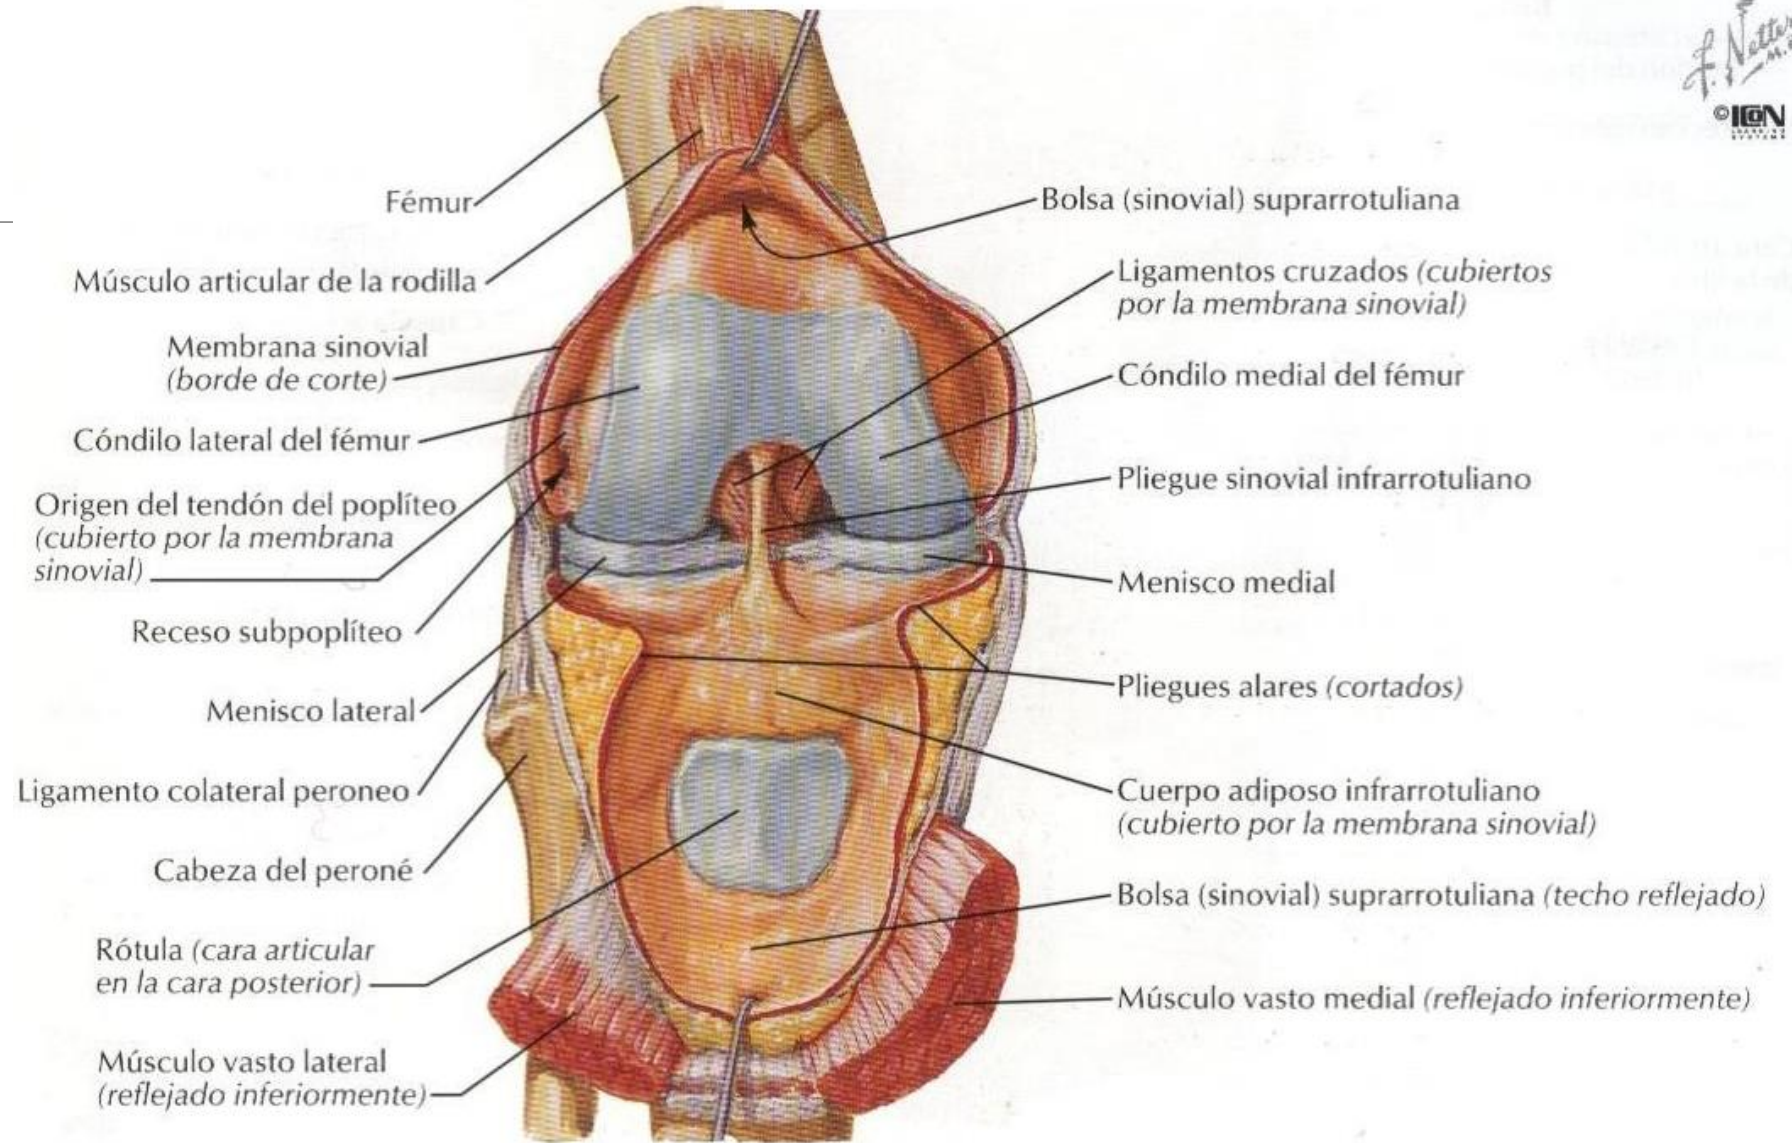

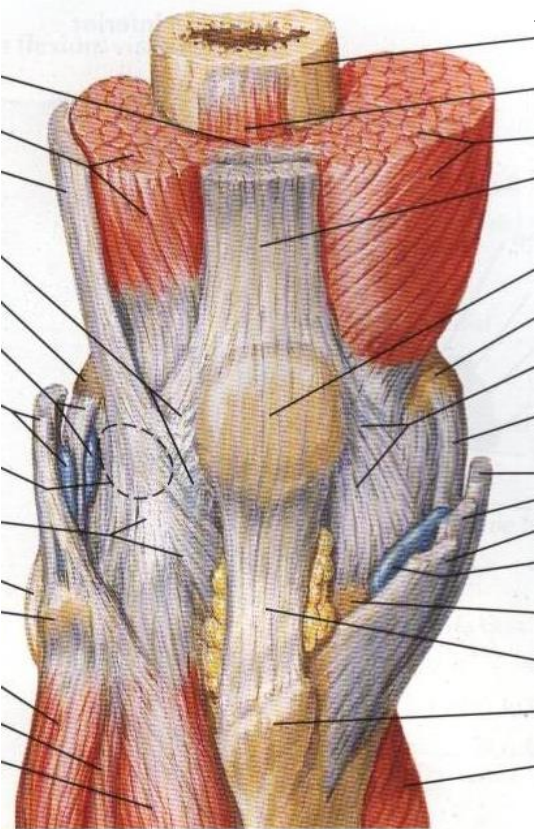

Tibia y peroné (fíbula)

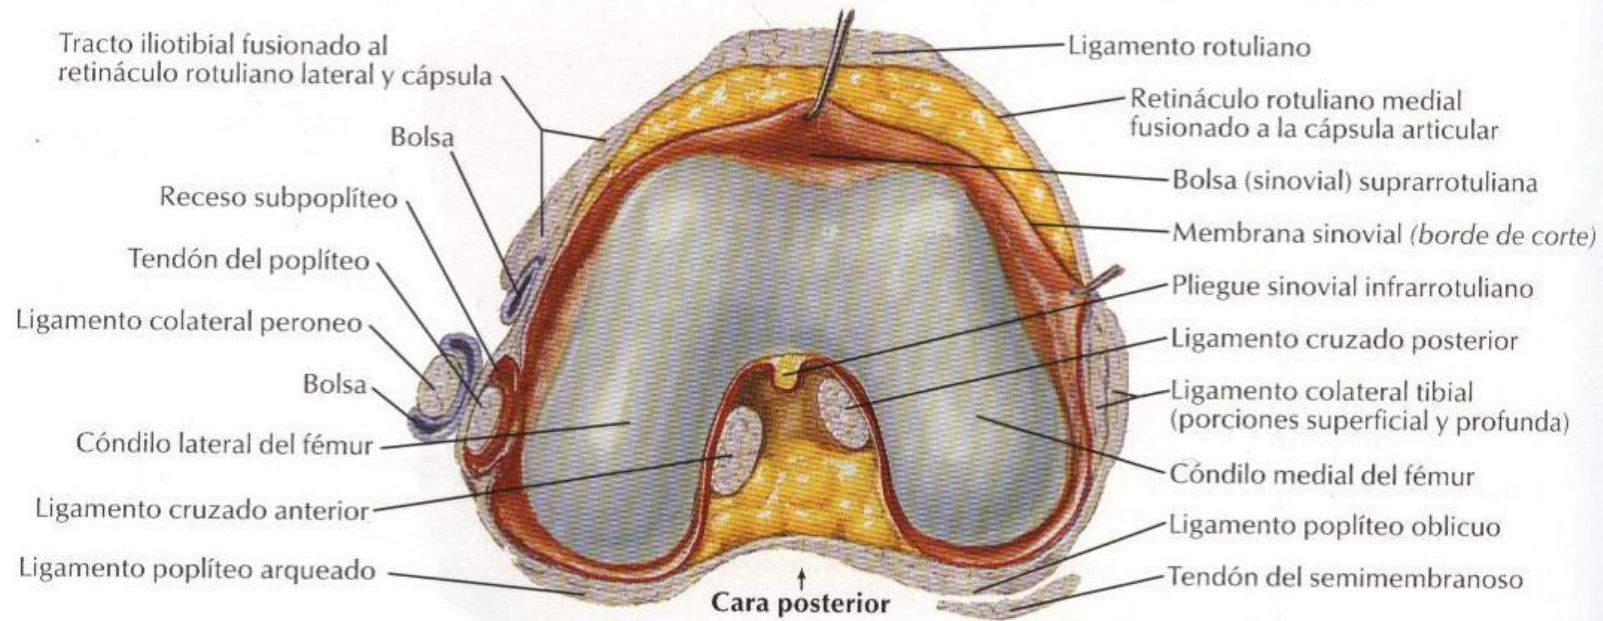

Rodilla derecha: visión posterior

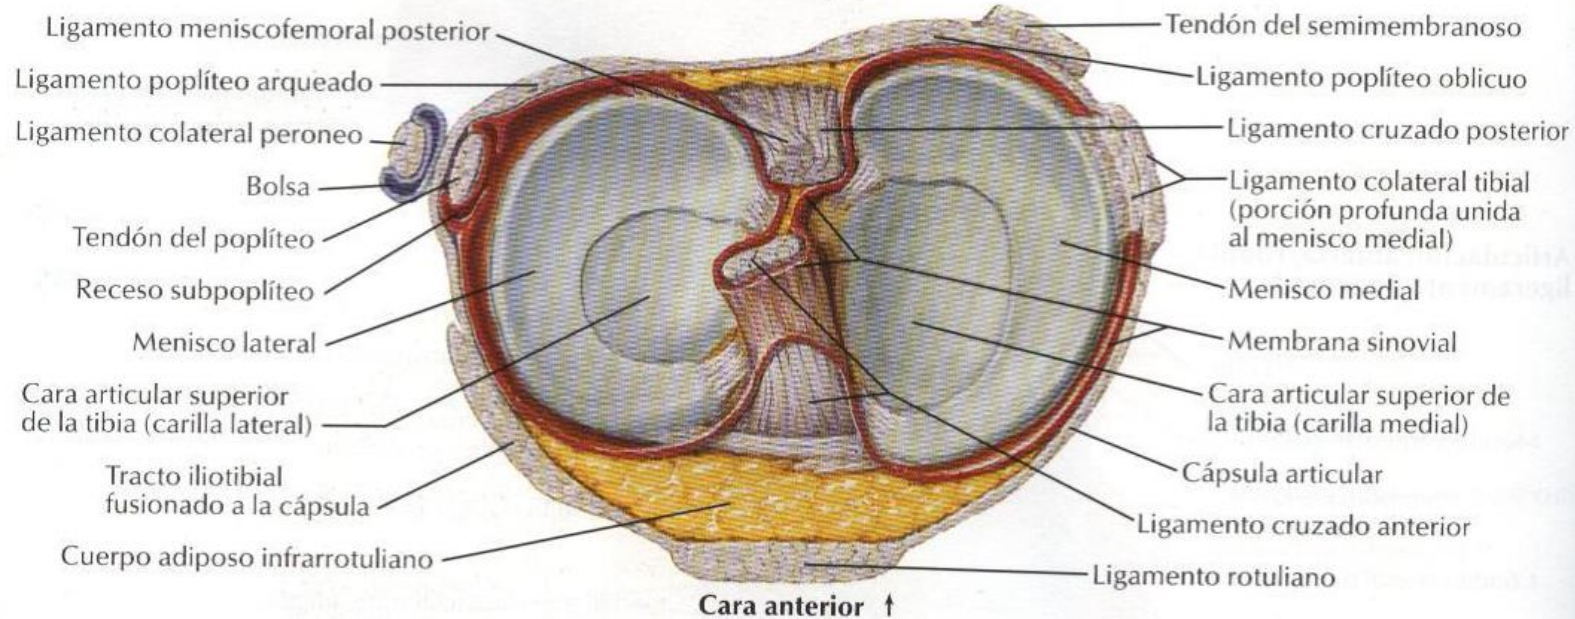

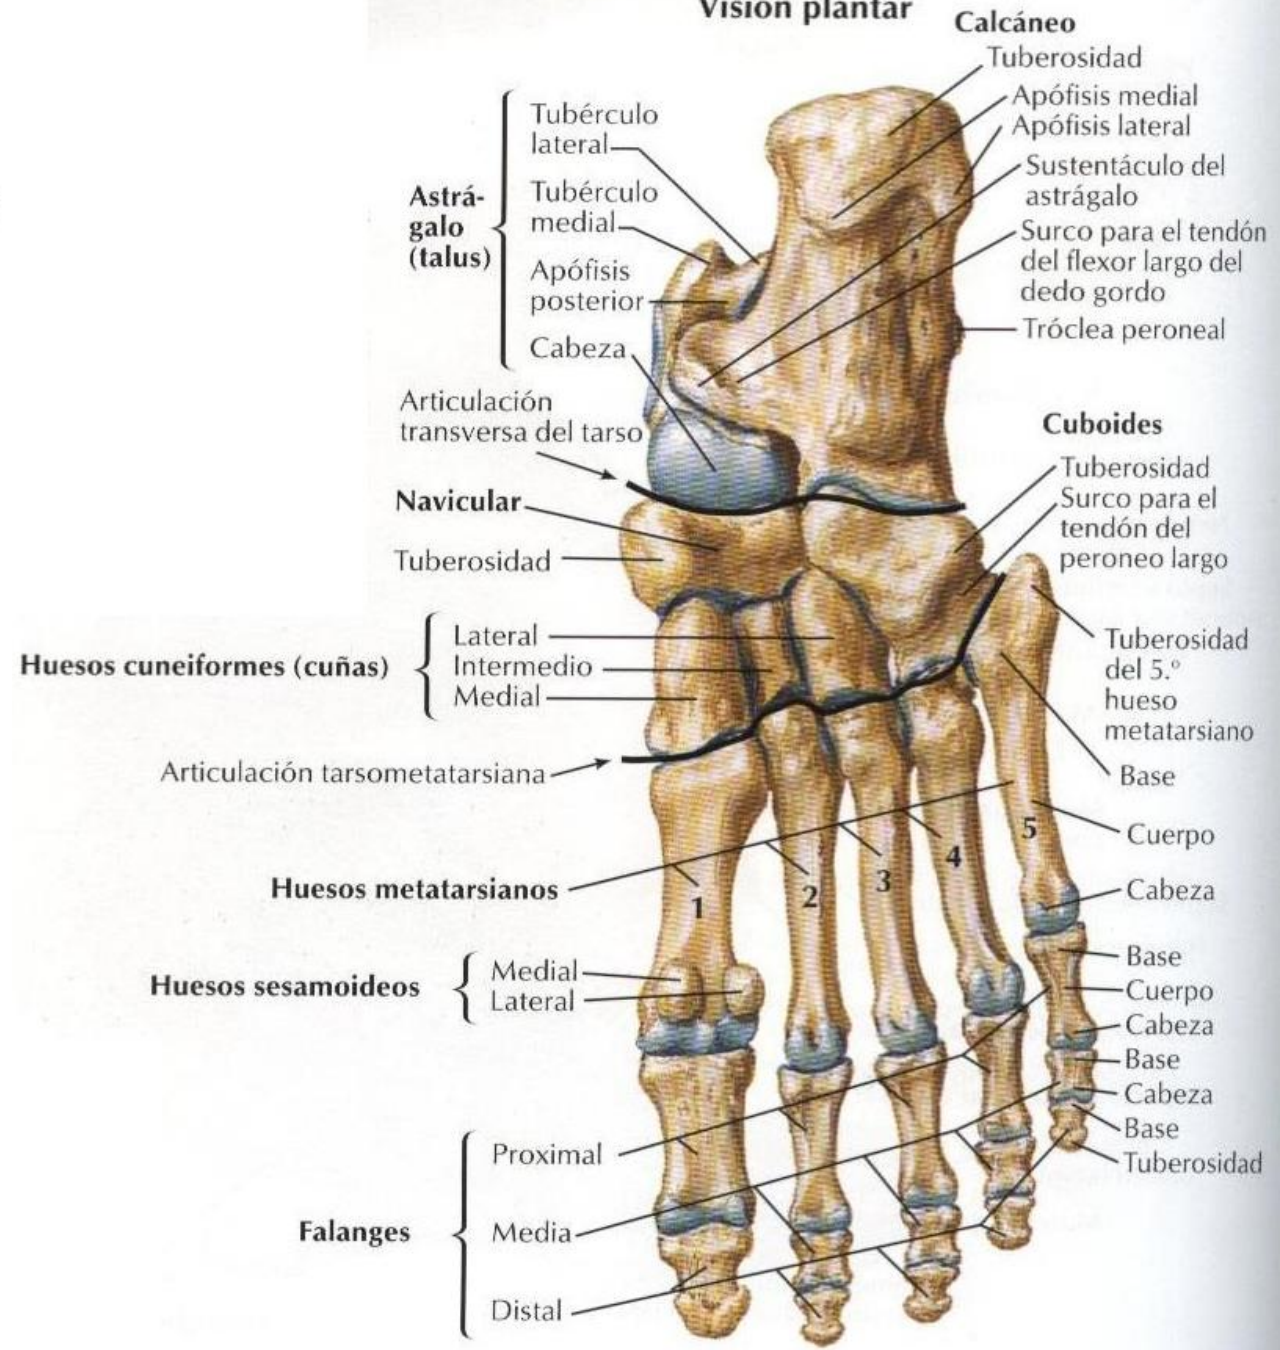

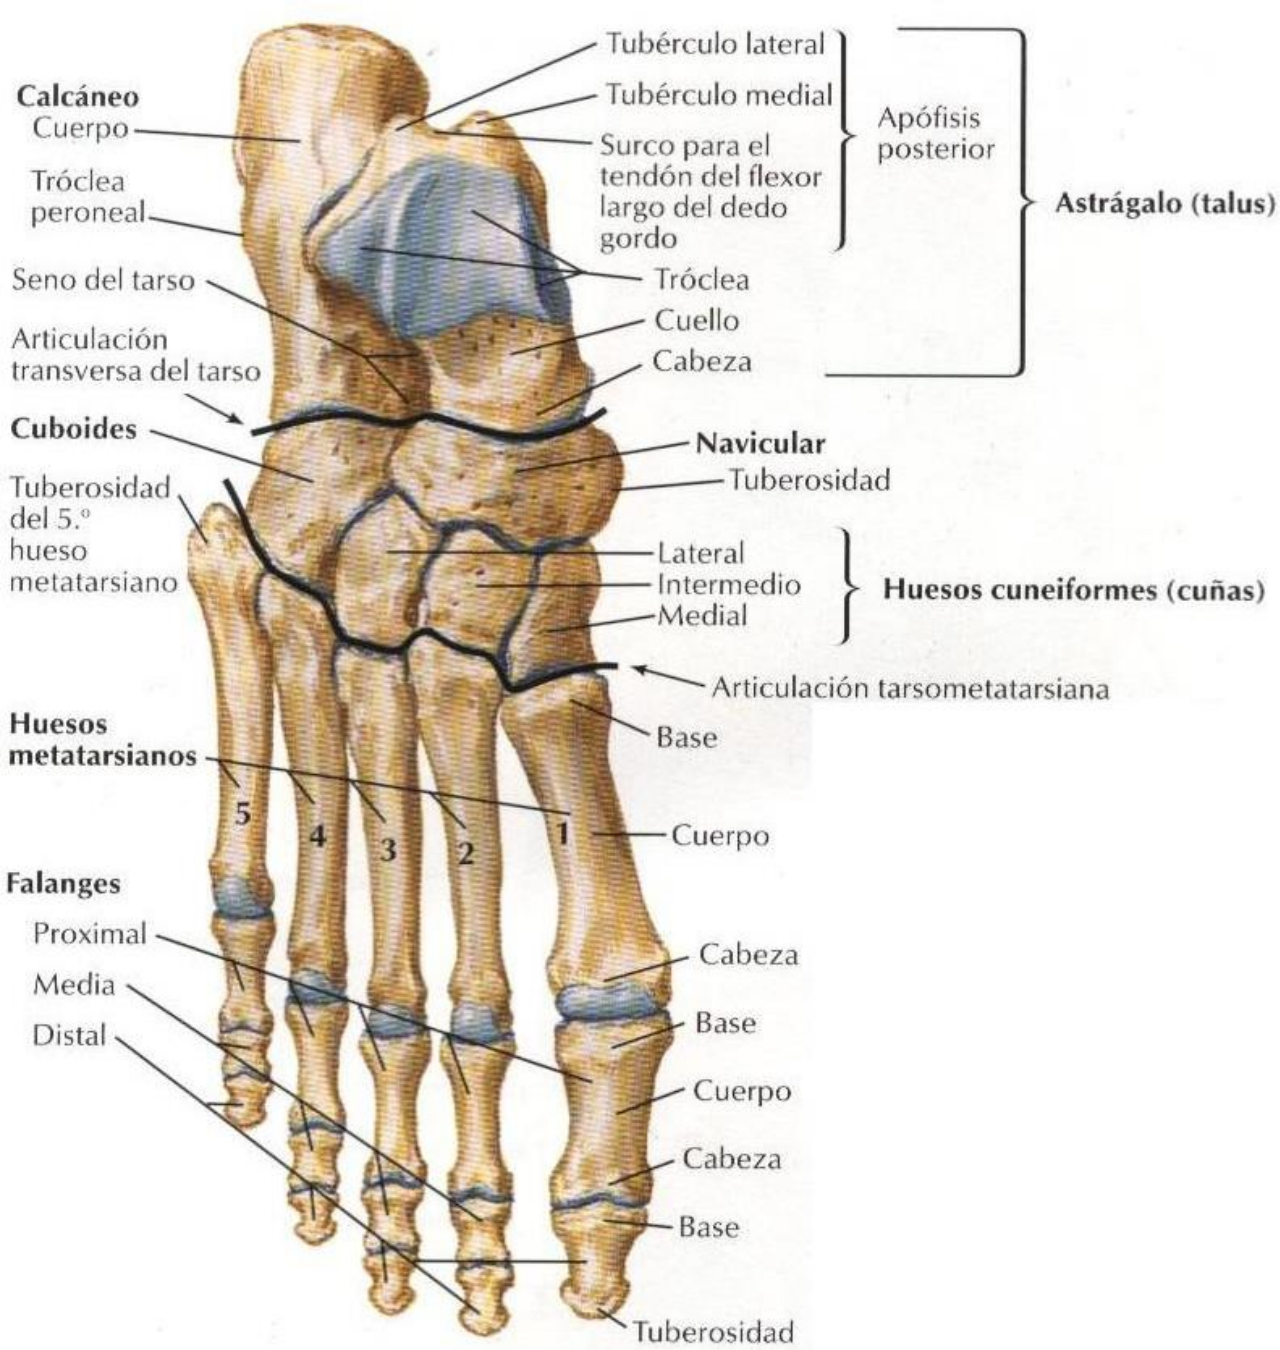

Visión inferior

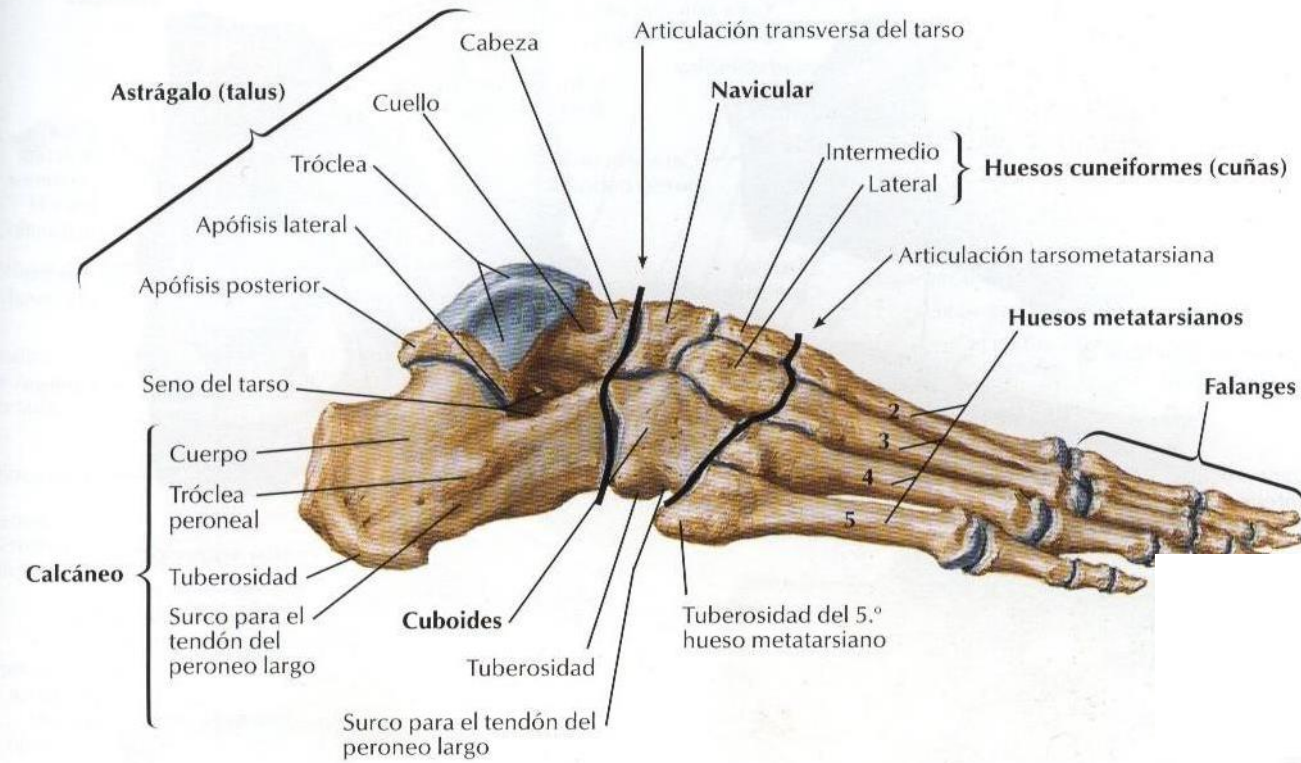

Visión superior

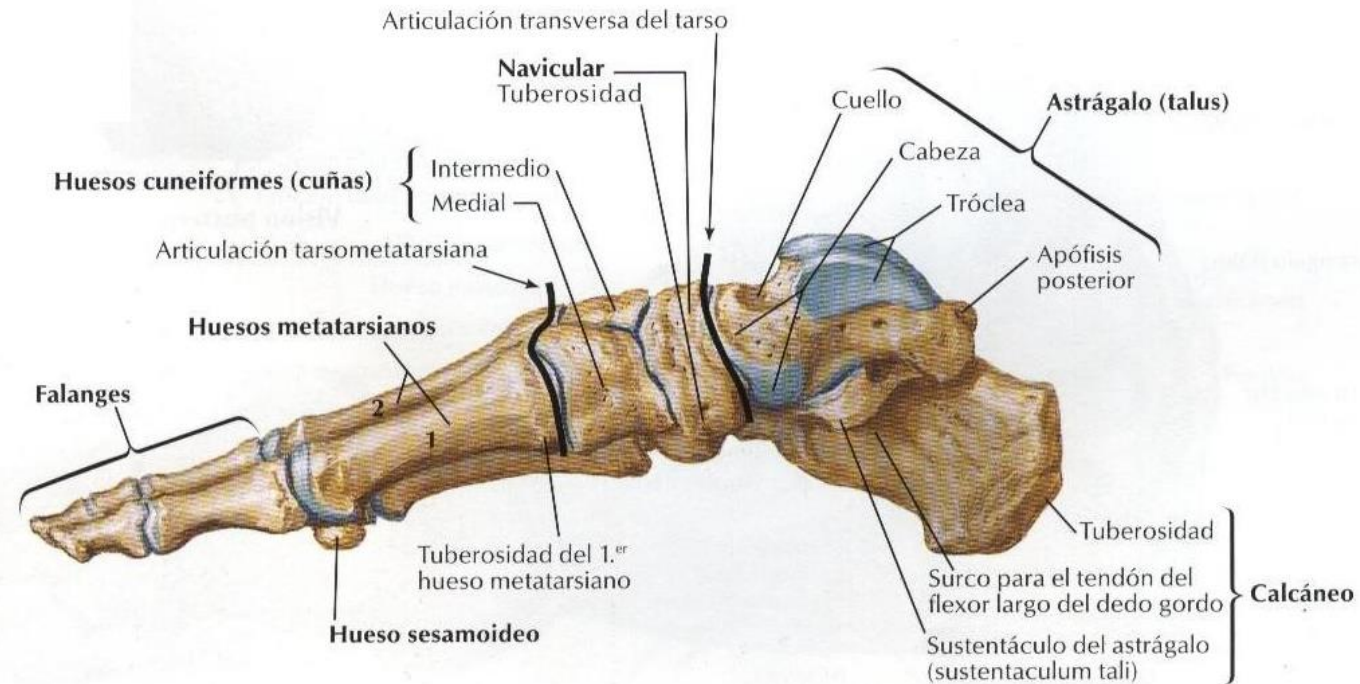

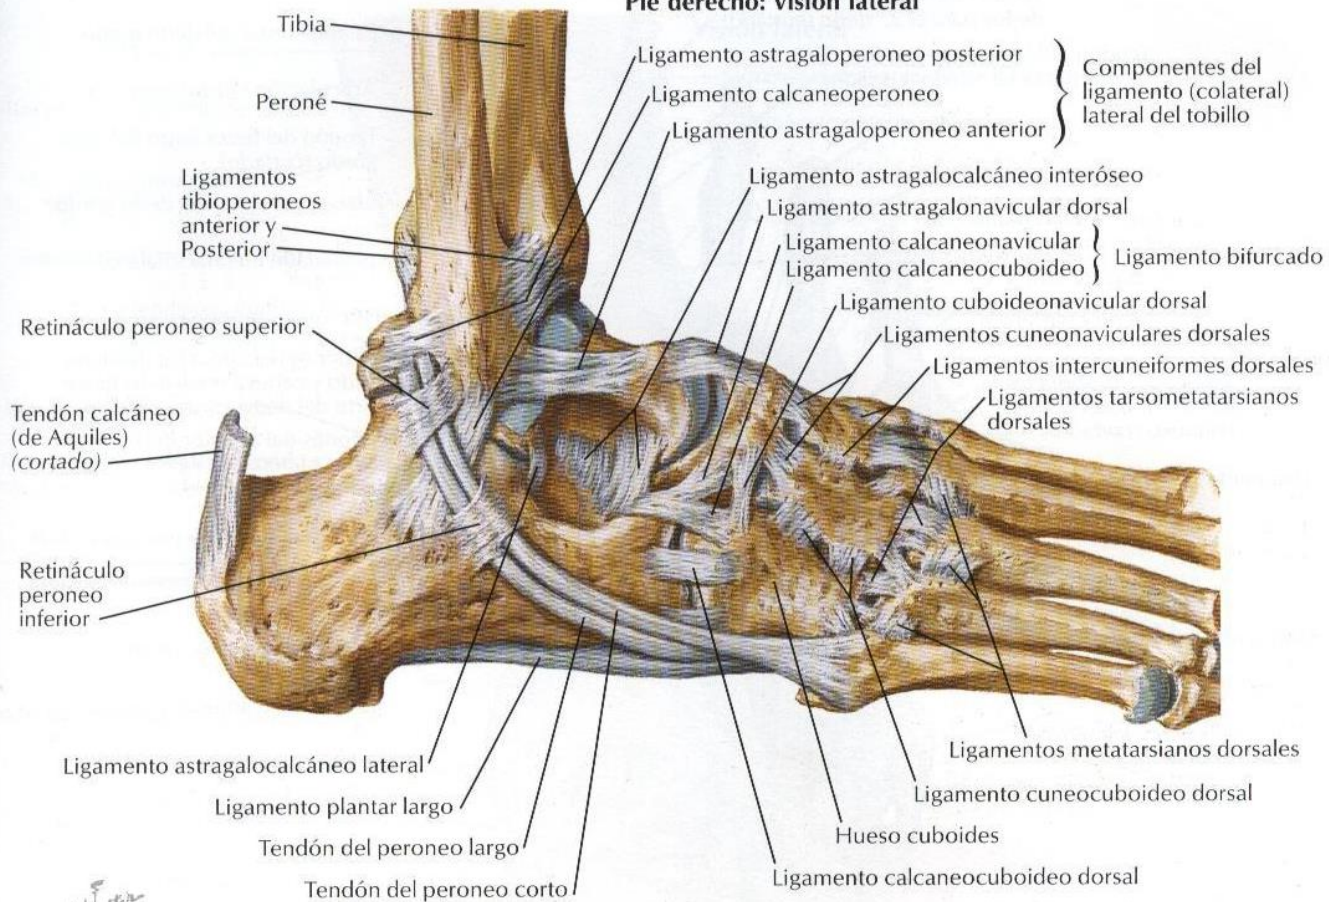

Visión lateral

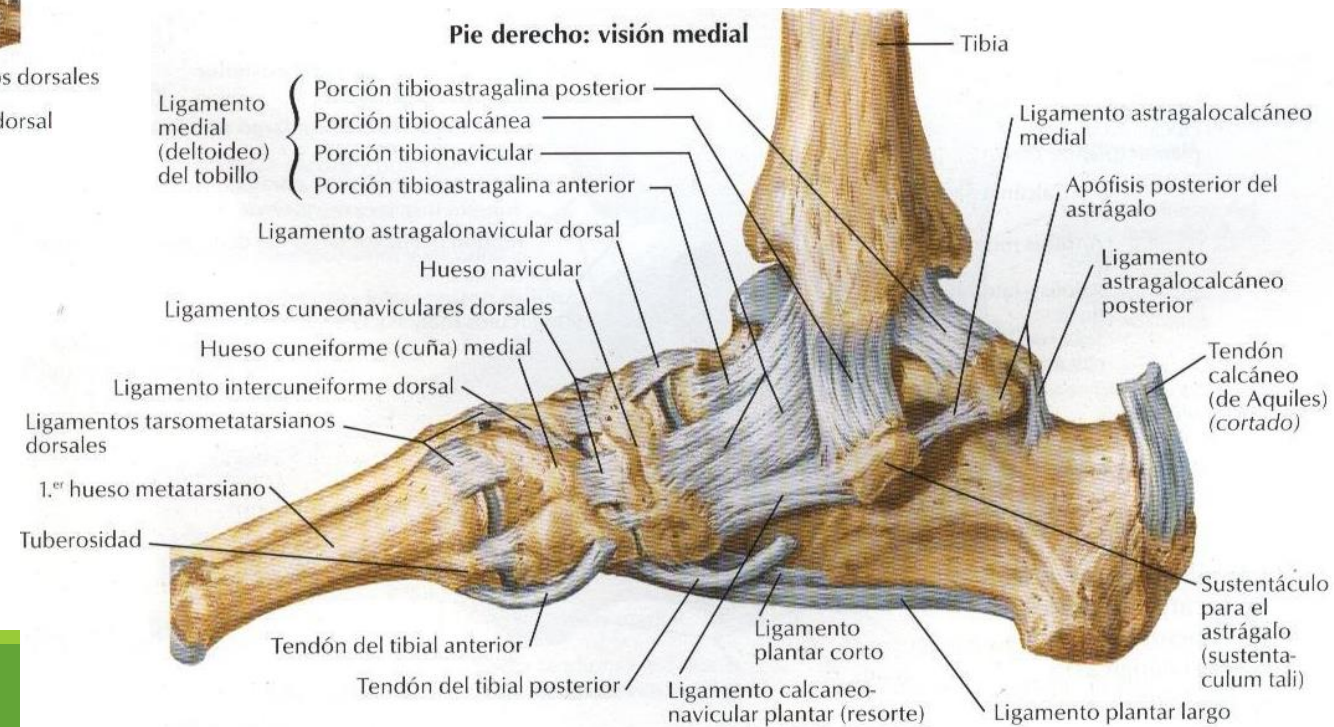

Visión medial

Pie derecho: visión lateral

Pie derecho: visión medial

Miología

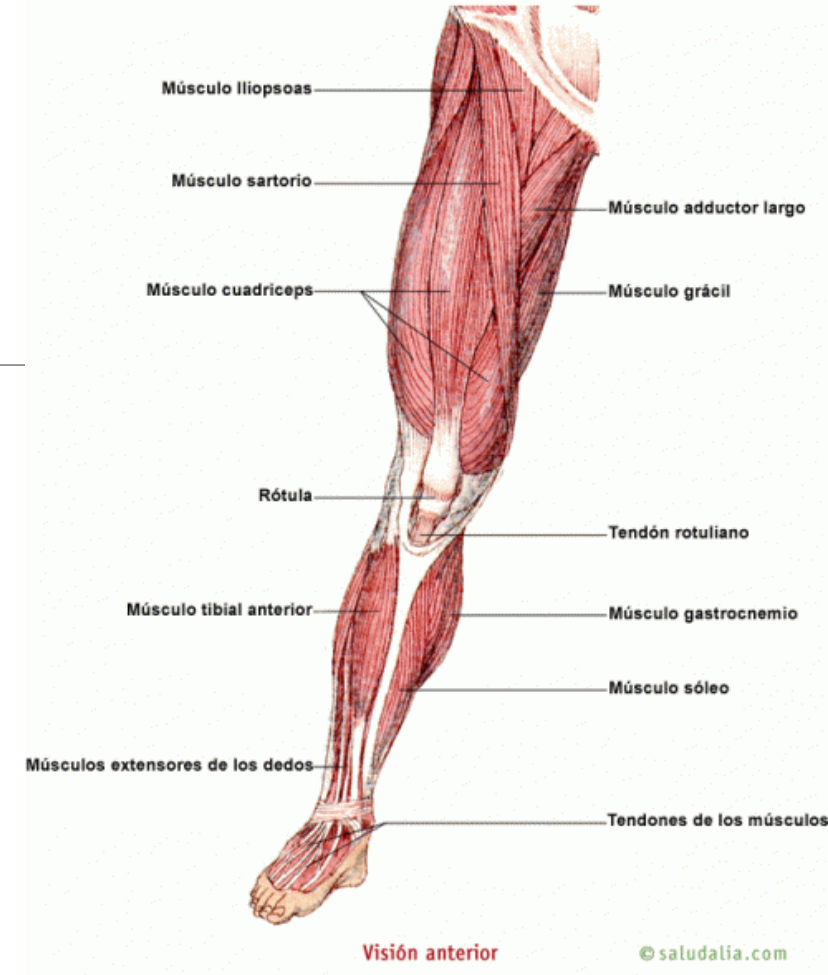

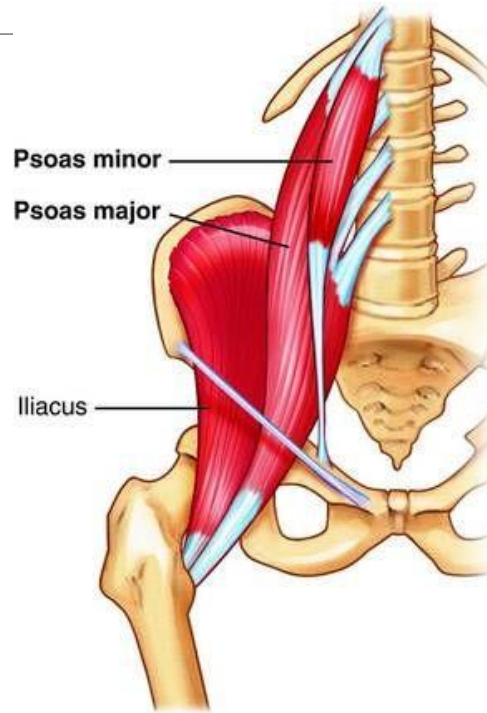

Músculos miembro inferior

Psoas iliaco: Lumbar: FI, I.I, R.C

- Cadera: FI, RE, abd

Musculatura anterior del muslo:

- Cuádriceps (FI cad, Ext rodilla)
- Sartorio Cad: (FI, RE, Abd)
Rodilla: FI, RI
- TFL: Cadera: FI, add
Rodilla: FL-Ext (acorde a función)
Pelvis: Apoyo unipodal

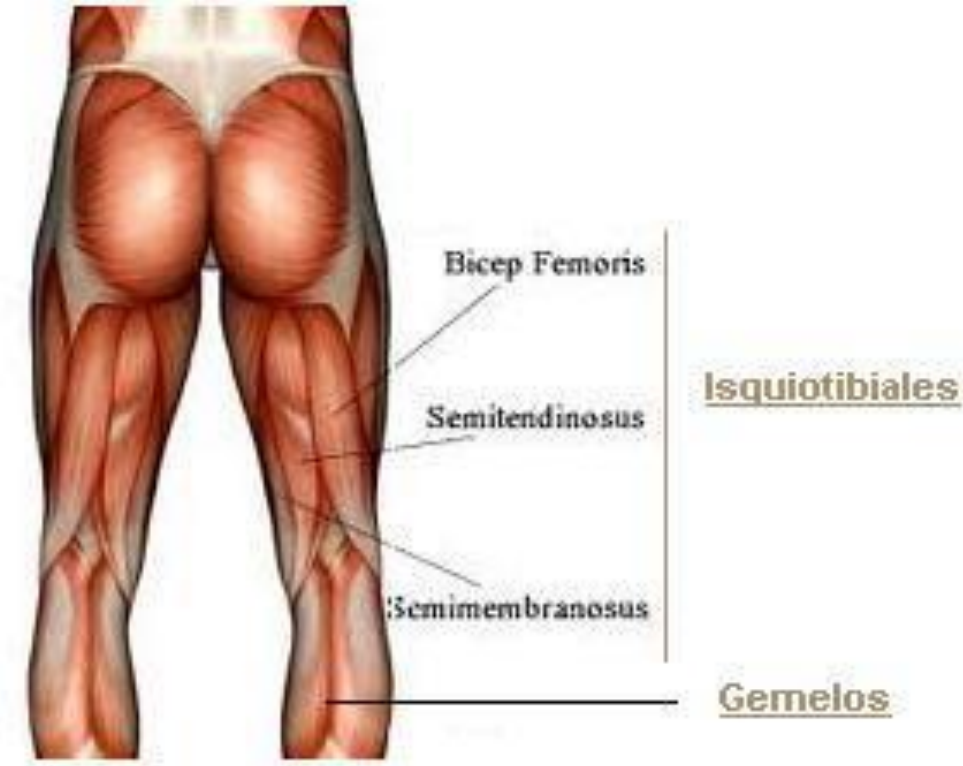

Musculatura zona glútea

- Glúteo mayor: Ext, RE, estabilización
- Glúteo menor (Abd, RE, Ext) y glúteo medio (Abd, FI, RI)
- Rotadores de cadera: Piriforme, gemino superior, interno, obturador interno y externo y cuadrado femoral

Músculos miembro inferior

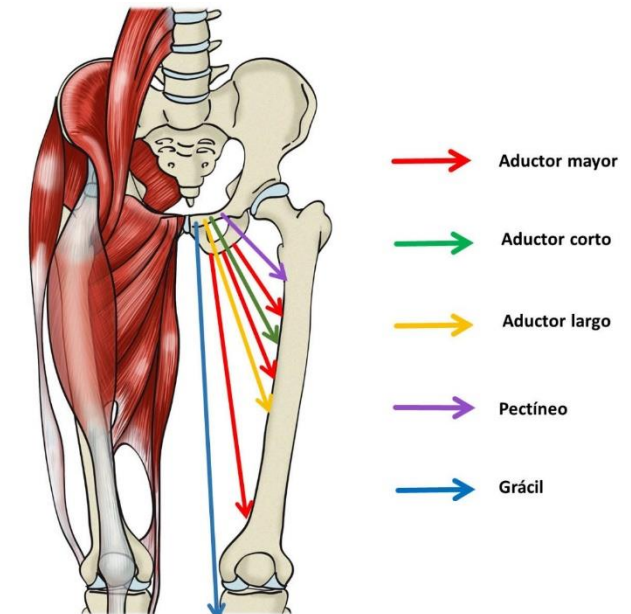

-Musculatura posterior del muslo (Conocida isquiotibiales)

- Bíceps femoral: Cadera:Ext
Rodilla: FI, RE
- Semitendinoso y Semimembranoso: Cadera:Ext
Rodilla: FI, RI

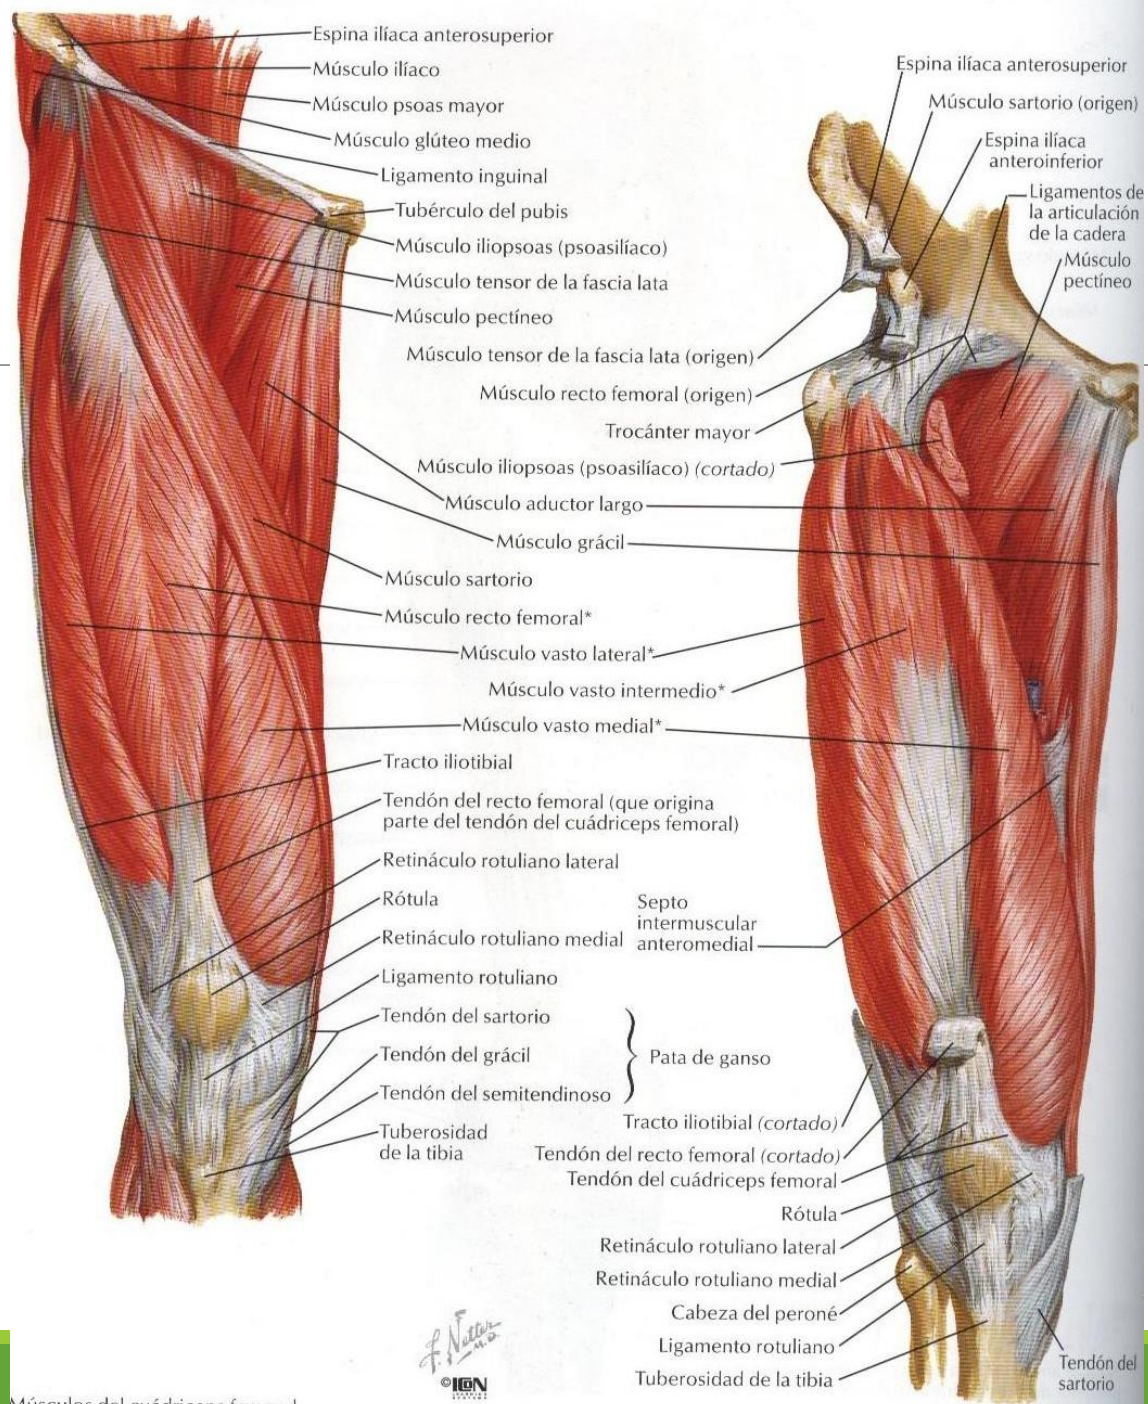

-Musculatura medial del muslo (Aproximadores de cadera)

- Grácil, pectíneo, aductor largo, aductor corto, aductor mayor

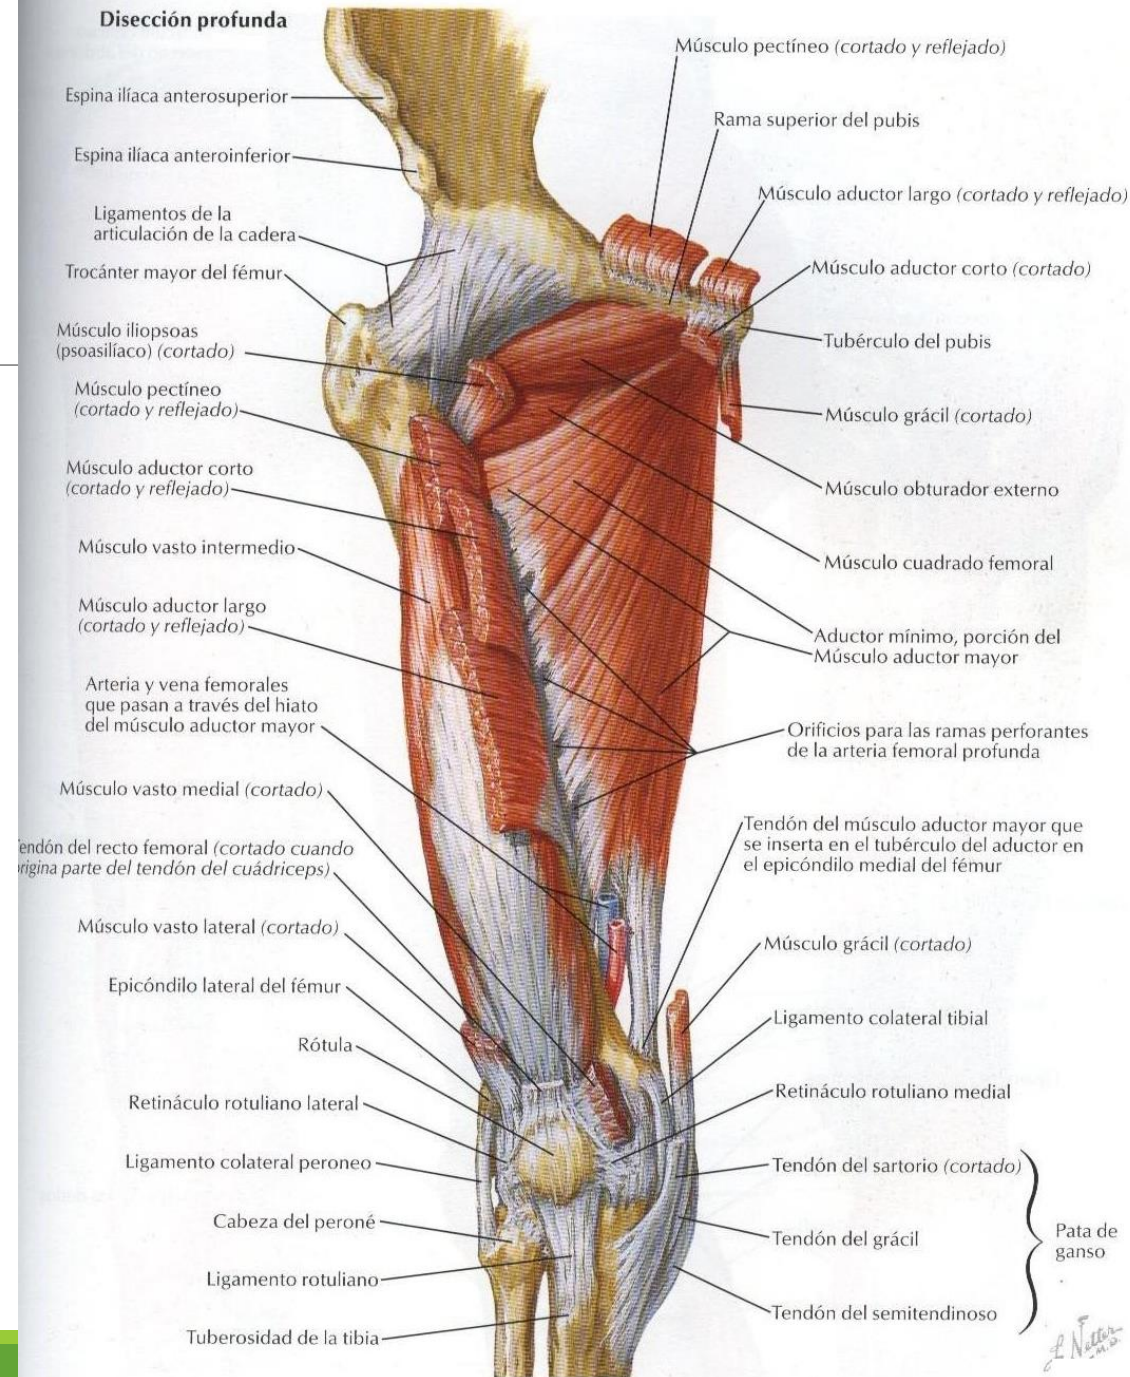

M. Psoasiliaco
 M. Piriforme
 M. Tensor de la Fascia Lata
 M. Obturador Interno
 M. Peptineo
 M. Sartorio
 M. Aductor Largo
 M. Recto del Fémur
 M. Recto Interno
 M. Aductor Mayor
 M. Cuadriceps Femoral
 Fascia Lata
 M. Vasto Medio
 Rótula
 Ligamento de la Rótula

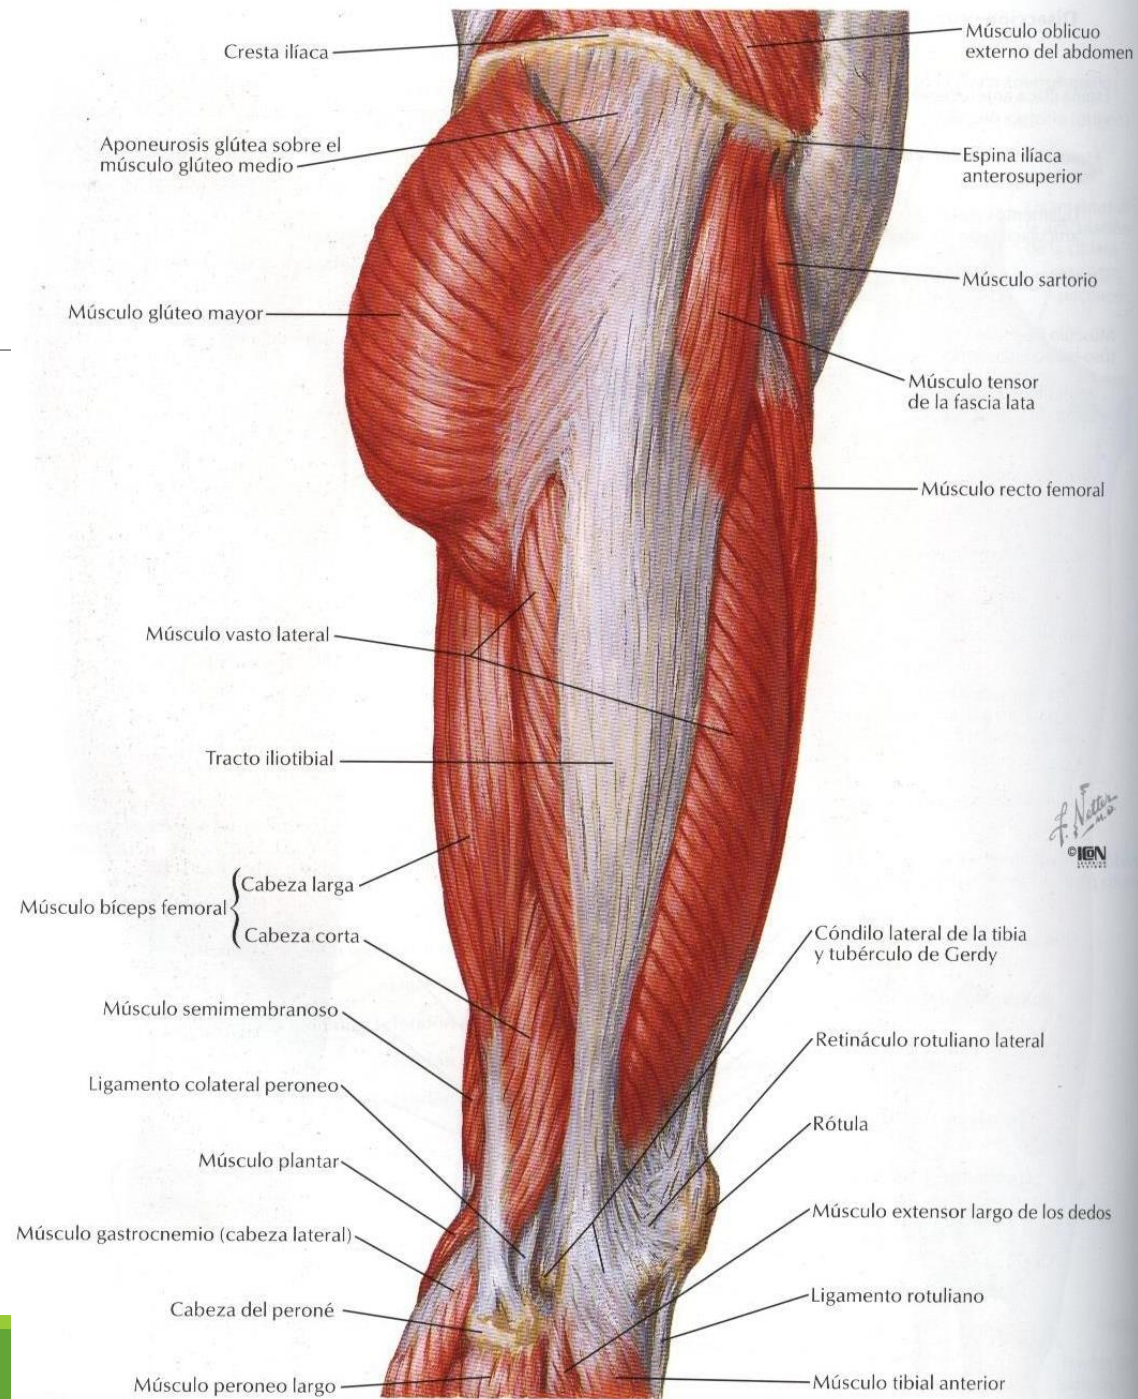

M. Glúteo Mayor
 M. Glúteo Medio
 M. Glúteo Menor
 M. Piriforme
 M. Tensor de la Fascia Lata
 M. Gemino Superior
 M. Obturador Medio
 M. Gemino Inferior
 M. Cuadrado del Fémur
 M. Adductor Menor
 M. Glúteo Mayor
 M. Adductor Mayor
 M. Recto Interno
 M. Biceps Femoral
 M. Vasto Lateral
 M. Semitendinoso
 M. Sartorio
 M. Semimembranoso
 Músculos Gemelos

Músculos del cuádriceps femoral
